Snowflake Data Engineer

Summary

Data Engineer with 3+ years of experience designing and implementing scalable data architectures and ETL pipelines in AWS and Azure environments. Skilled in real-time data streaming with Kafka and Spark, automating ingestion and transformation workflows, and optimizing Snowflake and Data bricks for performance. Proven ability to enhance query efficiency and drive actionable insights through robust data models and visualization. Focused on secure, high-performance data solutions.

Areas of Expertise

- Data Engineering & ETL: Apache Airflow, AWS Glue, Azure Data Factory, SSIS, Snowflake, Databricks, HDFS, Data Pipelines
- Programming Languages: Python (Pandas, NumPy, Scikit-learn), SQL, Bash, VBA
- Cloud Platforms: AWS (S3, RDS, Redshift, Code Pipeline), Azure (Data Lake Storage, Synapse Analytics, Kubernetes Service), Cloud Computing
- Data Architecture & Modeling: Star Schema, Snowflake Warehouses, Data Architecture
- Data Visualization & Reporting: Tableau, Power BI, Azure Analysis Services
- Big Data & Streaming: Apache Spark, Kafka, Spark Structured Streaming
- Version Control & CI/CD: GitHub, Jenkins, Docker, Kubernetes, AWS Code Build
- Data Security & Compliance: HIPAA standards, Role-Based Access Control (RBAC)
- Tools & Utilities: Excel (Pivot Tables, VLOOKUP), UC4/Autom8, Natural Language Processing (NLP)

Work Experience

Optum, Minneapolis, MN

Feb 2024 - Present

Data Engineer

- Designed and managed scalable data pipelines and ETL workflows using Apache Airflow on AWS, integrating data from Amazon S3, RDS, and Redshift into Snowflake for supply chain reporting.
- Configured and optimized Snowflake warehouses as part of overall data architecture strategy, creating consumption views, managing role-based access controls, and improving query performance by 35%.
- Built data processing workflows using Spark on Databricks and HDFS, ensuring efficient processing of large-scale datasets.
- Automated routine processes using Python and Bash scripts for data transformation, validation, and monitoring within the AWS Glue environment, leveraging cloud computing to ensure scalability and reliability.
- Deployed containerized applications using Kubernetes and Docker, enhancing CI/CD processes for seamless deployments and runtime efficiency.
- Created advanced dashboards in Tableau and optimized Snowflake queries to provide real-time insights into supply chain KPIs and trends.
- Integrated GitHub for version control and Jenkins for automating deployments, ensuring consistency and scalability across development and production environments.

Tech Mahindra, Hyderabad, India

Dec 2022 - July 2023

Data Analyst / Data Engineer

- Provided timely and accurate analysis for academic leadership, leveraging insights from institutional data to support strategic decision-making.
- Conducted comprehensive data analysis to identify trends and anomalies in student performance datasets, enabling data-driven improvements in resource allocation.
- Utilized Excel for financial modeling, creating pivot tables, VLOOKUP formulas, and visualizations to streamline reporting processes.
- Developed interactive dashboards in Power BI and Tableau, presenting insights effectively to stakeholders and improving the accessibility of key performance metrics.
- Designed and optimized ETL processes and data streaming using SQL, SSIS, and Kafka to extract, transform, and load academic data from multiple sources, ensuring high data quality and consistency.
- Automated recurring workflows using Python, including web scraping and Natural Language Processing (NLP), reducing manual effort by 25%.
- Collaborated with university departments to analyze finance and academic performance data, identifying areas for operational improvements and cost efficiencies.
- Supported data integration for reporting on Azure Analysis Services, reducing latency and enabling faster decision-making.

PeopleSoft, Inc Hyderabad, India

Jan 2022 - Nov 2022

Data Engineer

- Migrated legacy data infrastructure to a cloud-native environment using Azure Data Lake Storage, Azure Data bricks, and Azure Synapse Analytics, significantly enhancing scalability, performance, and cost efficiency.

- Designed and deployed real-time data processing pipelines with Azure Stream Analytics, Apache Kafka, and Spark Structured streaming, enabling actionable insights into healthcare claims and patient trends.
- Developed and optimized ETL processes for seamless data integration from diverse sources into the enterprise data warehouse using Azure Data Factory and UC4/Automagic workflows.
- Integrated Azure Kubernetes Service (AKS) for container orchestration and managing micro services, ensuring high availability and fault tolerance of data applications.
- Configured and managed data processing job schedules in the UC4/Automagic environment, ensuring timely execution based on business dependencies and requirements.
- Implemented Docker-based CI/CD pipelines integrated with AWS Code Pipeline and Code Build, automating application builds, testing, and deployments.
- Optimized Spark job on Azure Databricks by tuning configurations and leveraging advanced techniques, reducing processing times by 30%.

Education Details

Master of Science, Computer Science & Information Systems Saint Louis University

2023- 2025

Certificates

- Snowflake SnowPro Core
- Snowpro Advanced Data analyst
- Snowpro speciality Gen Ai
- SnowPro advanced practice Data Engineer
