

# SRAVANTHI POCHAMPALLY

Dallas, TX | +1 910-441-0888 | Sravanthipochampally3@gmail.com | Visa: H4 EAD

## SUMMARY

---

Data Engineer with 6+ years of experience designing and maintaining large-scale data pipelines and lakehouse architectures. Strong expertise in Databricks, Apache Spark, PySpark, SQL, and Delta Lake for building reliable ETL pipelines and scalable analytics platforms. Experienced in dimensional data modeling, Power BI semantic layers, and implementing data governance and quality frameworks in enterprise environments. Proven ability to deliver high-quality data solutions supporting analytics, reporting, and regulatory compliance.

## PROFESSIONAL EXPERIENCE

---

### Data Engineer

Jan 2023 – Aug 2025

*Epsilon, USA*

- Designed and maintained batch ETL pipelines on the Databricks Lakehouse platform ingesting millions of customer events daily.
- Developed scalable data transformations using PySpark and Spark SQL converting raw data into curated analytics datasets.
- Implemented Delta Lake tables supporting ACID transactions, time travel, and schema enforcement for reliable data processing.
- Optimized large-scale Spark workloads using partitioning strategies, caching, and Delta Lake operations including OPTIMIZE, VACUUM, and Z-ORDER.
- Implemented MERGE INTO operations for incremental updates and slowly changing dimension processing.
- Built dimensional models including star schemas and aggregation tables supporting Power BI dashboards and self-service analytics.
- Developed automated data quality checks, reconciliation validations, and monitoring alerts improving pipeline reliability.
- Maintained historical data retention and audit trails supporting governance and regulatory requirements.
- Collaborated with architects, analysts, and stakeholders translating business requirements into scalable pipeline architectures.

### Data Engineer

Sep 2019 – Aug 2022

*HCL Technologies, India*

- Built enterprise ETL pipelines ingesting structured and unstructured data from multiple source systems into distributed storage platforms.
- Developed Spark and Hadoop batch processing pipelines transforming hundreds of millions of records into analytics-ready datasets.
- Implemented dimensional data models and star schema designs supporting reporting and analytical workloads.
- Developed data validation frameworks using Python to enforce data quality, reconciliation checks, and completeness validation.
- Designed data warehouse layers using Hive and SQL supporting enterprise reporting and analytics teams.

- Implemented pipeline orchestration and monitoring workflows improving reliability and operational observability.
- Documented pipeline architecture, transformation logic, runbooks, and operational procedures.

## **Data Engineer**

**Apr 2019 – May 2019**

*Trigent Software, India*

- Developed ETL workflows using Talend integrating relational data sources including MySQL and PostgreSQL.
- Performed SQL-based data profiling, transformation, and validation across staging datasets.
- Implemented file-based ingestion pipelines and automated data validation scripts using Python.
- Documented entity relationship diagrams, transformation logic, and operational procedures supporting engineering teams.

## TECHNICAL SKILLS

---

**Data Engineering Platforms:** Databricks Lakehouse, Delta Lake, Apache Spark, PySpark

**Delta Lake Operations:** OPTIMIZE, VACUUM, Z-ORDER, MERGE INTO, Time Travel

**Programming Languages:** Python, SQL, Java

**Data Modeling:** Dimensional Modeling, Star Schema, Slowly Changing Dimensions, Aggregation Tables

**Analytics Tools:** Power BI, Semantic Modeling, Data Warehousing

**Distributed Systems:** Apache Spark SQL, Hadoop MapReduce, Kafka

**Cloud Platforms:** AWS, Azure Data Lake Storage

**Data Governance:** Data Lineage, Metadata Management, Access Controls, Encryption, PII Handling

**DataOps & DevOps:** Git Version Control, CI/CD Pipelines, Workflow Orchestration

**Compliance:** AML, Bank Secrecy Act (BSA), Regulatory Data Governance

## EDUCATION

---

**Bachelor of Technology – Electronics and Communications Engineering**

CVR College of Engineering, India

2019
