Summary

Experienced Data Engineer with 4 years of experience designing and implementing scalable data platforms within Azure-based ecosystems. Strong expertise in building end-to-end data pipelines, data lakehouse architectures, and dimensional models using Azure Data Factory, Databricks, Synapse, and SQL. Proven ability to translate business requirements into modern data solutions, integrating data from APIs and enterprise systems into analytics-ready platforms. Experienced in optimizing data workflows for performance, scalability, and reliability while ensuring data quality, governance, and security. Skilled in collaborating with cross-functional teams and delivering high-impact data solutions aligned with business objectives.

Technical Skills

- **Programming Languages:** Python, C, Java, R, Object Oriented Programming
- **Databases:** SQL, MySQL, SQL Server
- **Front-End Technologies:** HTML, CSS, JavaScript, AJAX, JSON, React JS, Angular JS
- **Cloud Platforms & Services:** AWS, S3, Lambda, ECS, CloudWatch, CloudFormation, Azure, GCP
- **Software Development Methodologies:** Agile, SCRUM, Waterfall
- **DevOps & APIs:** Jenkins, REST APIs, OAuth, API Integration
- **Libraries:** Pandas, NumPy, Matplotlib, SciPy, Plotly, Seaborn
- **Machine Learning & AI:** Scikit-learn, Regression, Decision Trees, Random Forest, KNN
- **Data Visualization Tools:** Tableau, Power BI
- **Big Data Technologies:** Apache Spark, Hadoop, Databricks
- **Data Engineering & Platforms:** Data Pipelines, Data Warehouse, Data Modeling, Data Integration
- **Data Governance & Security:** Data Quality, Data Validation, Data Governance, Compliance
- **Professional & Consulting:** Cross-Functional, Documentation, Mentorship

Professional Experience

Molina Healthcare

February 2025– Present

Data Engineer

United States

Technologies: Azure Data Factory, Azure Databricks, PySpark, Azure Synapse, ADLS, SQL, Python, Power BI, REST APIs, Git, CI/CD

- Architected and implemented end-to-end data pipelines using Azure Data Factory and Databricks to ingest and transform healthcare data into a scalable lakehouse architecture.
- Designed dimensional data models (star schema) to support reporting and analytics use cases, improving query performance and data usability.
- Integrated data from APIs and enterprise systems, transforming JSON data into structured formats for downstream analytics.
- Collaborated with business stakeholders and analytics teams to translate requirements into scalable data solutions aligned with healthcare objectives.
- Optimized pipeline performance and data workflows using partitioning, parallel processing, and efficient transformation logic.

Cognizant Technology Solutions

June 2022 – July 2023

Data Engineer

India

Technologies: Azure Data Factory, Azure Databricks, Apache Spark, SQL, Python, Azure Synapse, REST APIs, Docker, Jenkins

- Designed and developed scalable ETL pipelines using Azure Data Factory and Databricks, integrating data from multiple enterprise systems.
- Built reusable transformation logic using PySpark and SQL, standardizing data processing and improving development efficiency.

- Developed dimensional models and data warehouse structures to support business intelligence and reporting solutions.
- Implemented API-based data ingestion workflows, handling JSON data transformation and normalization into relational formats.
- Participated in architecture discussions and contributed to scalable data solution designs aligned with business requirements.

I-SPARROW

June 2020 - May 2022

Data Engineer

India

Technologies: Python, SQL, Snowflake, Hadoop, Hive, Power BI, REST APIs, GitHub Actions

- Developed ETL pipelines to ingest and transform data from APIs, databases, and flat files into Snowflake data warehouse.
- Designed data models and reporting datasets to support analytics and business intelligence initiatives.
- Built dashboards using Power BI to deliver insights and improve data accessibility for stakeholders.
- Implemented data validation and quality checks to ensure accuracy and consistency across data systems.
- Supported system integration efforts and ensured seamless data flow across multiple platforms.

Education

Master of Science in Computer Science

August 2023 – May 2025

[University of Missouri, Kansas City, Missouri, USA](#)

Bachelor of Technology in Computer Science and Engineering

August 2018 – June 2022

[Saveetha School of Engineering, Chennai, India](#)

Certifications

- Certified as AWS Data Engineer – Associate – Amazon Web Services.
- Attained AWS Developer – Associate certification – Amazon Web Services.
