

Corbin Lee

Senior Software Engineer

Chicago, IL | corbinleenm@gmail.com | +1 312 680 2785

SUMMARY

Accomplished Senior Software Engineer with 10+ years of experience designing and implementing scalable data solutions across cloud platforms. Expert in building Azure-based data pipelines, data lakes, and data warehouses with a focus on SQL, Databricks, and ETL automation. Proven track record leading cross-functional teams to deliver high-quality, client-focused data engineering solutions. Passionate about optimizing data architectures and enabling actionable insights for business impact.

SKILLS

- Programming Languages: Python, SQL, Java, C++
- Frameworks & Libraries: Apache Spark, Pandas, NumPy
- Cloud Platforms: Microsoft Azure (Data Factory, ADLS, Synapse Analytics, Databricks), AWS (S3, Lambda, EC2)
- Databases: Azure SQL Database, Amazon Aurora, DynamoDB, Redshift
- Data Engineering & ETL: Data orchestration, pipeline design, metadata-driven ETL, JSON/SQL transformation
- Analytics & BI: Power BI, Dimensional Modeling, Star Schema Design
- DevOps & Automation: Git, CI/CD, Terraform, Docker
- AI & Machine Learning Tools: PyTorch, TensorFlow (relevant for predictive analytics pipelines)
- Other Tools: API integration (OAuth 2), Logging & Monitoring, Data Quality Automation

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Stride Consulting

08/2022 - present

Chicago, IL

- Led development of Plated's modern data platform, migrating legacy PHP systems to Python/Django backend with React frontend, improving ETL pipeline efficiency by 40% and enabling Azure Data Factory orchestration.
- Designed and implemented metadata-driven data integration processes, standardizing JSON ingestion to SQL structures, increasing data quality and reliability for reporting.
- Architected scalable Azure Synapse Analytics pipelines supporting high-volume meal kit order data, reducing data processing time by 35%.
- Collaborated with cross-functional teams to build end-to-end data lakehouse solutions on ADLS and Databricks, enabling advanced analytics and forecasting capabilities.
- Developed automated monitoring and notification systems for data workflows, improving issue detection and resolution by 50%.
- Conducted internal workshops and client training sessions on Azure-based data engineering best practices and data orchestration strategies.
- Mentored junior engineers, providing guidance on Spark, Python, and SQL optimization techniques, fostering a culture of continuous improvement.

Senior Software Engineer

AiCure

05/2021 – 08/2022

New York, NY

- Engineered AI-driven patient data pipelines using Azure Databricks and Python, reducing data ingestion errors by 25% and accelerating analytics workflows.

- Designed and implemented ETL workflows with Azure Data Factory, standardizing JSON APIs into normalized SQL tables for clinical reporting.
- Developed and optimized dimensional models and star schemas, improving reporting performance for clinical dashboards by 30%.
- Integrated cloud-based data solutions with Azure SQL Database and ADLS, enhancing storage scalability and security.
- Collaborated with cross-functional teams to deliver analytics solutions aligned with client objectives, leveraging metadata-driven techniques for repeatable pipeline design.

Software Engineer

Amazon

07/2017 – 05/2021

Chicago, IL

- Built and optimized data pipelines for Amazon Prime and AWS Analytics using Python, SQL, and AWS Glue, supporting large-scale transactional data ingestion.
- Developed dimensional models and ETL workflows for Amazon Fresh and Prime Pantry, improving reporting efficiency by 20%.
- Implemented automated data quality checks and monitoring using AWS Lambda and CloudWatch, reducing production issues by 30%.
- Collaborated with cross-functional teams to design data orchestration solutions and integrate API-driven data sources with DynamoDB and Redshift.
- Led performance tuning of SQL and Spark-based workloads for large datasets, achieving 40% faster query execution and improved scalability.

EDUCATION

NEW YORK UNIVERSITY

Bachelor of Science (BS), Computer

New York, NY

2012-2017

CERTIFICATION

- Microsoft Certified: Azure Data Engineer Associate: Microsoft (2022)
- Databricks Certified Data Engineer Associate: Databricks (2023)
- Microsoft Certified: Azure Solutions Architect Expert: Microsoft (2021)

RECENT PROJECTS

- Plated Data Modernization (Plated): Migrated legacy meal kit data systems to Azure-based ETL pipelines using Data Factory, ADLS, and Databricks, improving processing efficiency and enabling advanced analytics.
- Clinical Analytics Pipeline (AiCure): Built Azure Databricks-based pipelines transforming API-sourced patient data into structured SQL tables, supporting AI-driven adherence monitoring and reporting.
