PROFESSIONAL SUMMARY

Senior Cloud & Data Engineer with 9+ years of experience designing secure, fault-tolerant cloud infrastructures. Expertise in AWS, Azure and automation, with a track record of improving efficiency by 40% and reducing costs by 15%. Well-versed in Python, SQL, Databricks, Spark and AWS (Glue, Redshift, S3), with a strong background in data modeling, governance and performance optimization. Proven ability to streamline deployments and enhance system resilience in enterprise environments.

TECHNICAL SKILLS

- **AWS Cloud:** IAM, S3, VPC, WAF, RDS, EC2, ROUTE 53, ECS, SNS, SQS, Security Groups, NACL
- **Tools:** Terraform, CloudFormation, Git, GitHub, Bash, YAML, HTML, Python, SQL, API, Postman
- **Orchestration:** Docker, ECS, EKS, Kubernetes, Jenkins, GitHub Actions, Helm, JIRA, Confluence
- **Monitoring:** CloudWatch, CloudTrail, Splunk, Prometheus, Grafana, Datadog
- **Database:** RDS, MySQL, Postgres, Redshift, Redis, DynamoDB
- **ETL:** AWS RedShift, AWS Glue, Databricks, Airflow, Apache Kafka, IoT, Apache Spark, Power BI, QuickSight
- **Operating Systems:** Windows, MacOS, Linux (Ubuntu, CentOS, Debian)

CERTIFICATIONS

- Amazon Web Services Security - Specialty
- Amazon Web Services Solutions Architect Associate
- Amazon Web Services Developer Associate
- Amazon Web Services Certified Cloud Practitioner
- Amazon Web Services AI Practitioner
- CKAD: Certified Kubernetes Application Developer
- Microsoft Azure Fundamentals [verify online](#)
- Microsoft Azure Data Fundamentals [verify online](#)
- **CREDLY** link for certifications validations [here](#)
- HashiCorp Certified Terraform Associate
- CompTIA Security+ Certified CE
- CompTIA Network+ Certified CE
- Certified SAFe 5 Scrum Master
- Splunk Core Certified User
- Salesforce Associate
- AWS Data Engineer Associate (IN PROGRESS)

PROFESSIONAL EXPERIENCE

CVS Health | Senior Cloud Data Engineer | July 2022 – Present

- Designed and maintained a key ring mapping table linking system identifiers across multiple vendors, enabling reliable cross-system analytics and reducing data reconciliation errors
- Implemented deduplication logic using timestamp-based record selection, improving data accuracy and ensuring integrity across downstream analytical datasets
- Designed and implemented Infrastructure as Code using **Terraform** for AWS resources, improving deployment consistency and reducing manual provisioning errors
- Developed and optimized **Databricks** data engineering pipelines for multi-source data integration, improving data reliability and supporting scalable analytics workloads
- Designed and implemented scalable **ETL/ELT data pipelines** to ingest, process and transform large, multi-source datasets supporting financial and analytical workloads
- Developed and maintained **complex SQL queries** and transformations to support reporting, BI tools and **machine learning** use cases
- Applied **performance optimization techniques** including partitioning, clustering and query tuning to improve data processing efficiency and reduce cloud compute costs
- Designed and optimized **data models and schemas** (dimensional modeling, data marts) to support analytics, reporting and machine learning workflows

- Implemented **data governance and security best practices**, ensuring compliant data storage, access control and usage in a cloud environment
- Leveraged frameworks such as **PySpark** and **SparkSQL** to streamline transformations and manage large-scale data processing
- Mentored and supported **Junior Engineers**, promoting best practices in data engineering, code quality and architecture design

Xerox Inc. | Cloud Engineer | May 2019 – July 2022

- Migrated and implemented multiple applications from on-premises to cloud using AWS services such as Route 53, EC2, S3, RDS, CloudWatch, CloudFormation, ELB, ECS and EKS
- Built **ETL** pipelines with Kafka to notify customers in real-time for maintenance request, lower toner levels and exceeding usage thresholds
- Integrated **SonarQube**, reducing security vulnerabilities by 40%
- Created and updated cloud environments configurations to establish **resource groups, Vnets, Subnets, Load Balancers**, VMs and security controls
- Utilized **AWS Lambda** to automatically stop/start EC2 instances resulting in over 15% in cost savings
- Deployed, implemented and maintained highly available Kubernetes clusters using Helm charts & Argo CD
- Set up alerting mechanisms for production issues, integrating **Splunk** with Monitoring tools and **ServiceNow** to automate incident tracking and ticket creation
- Set up **SNS** and **SQS** event notification to trigger data pipelines
- Developed and maintained complex **data models** (conceptual, logical and physical) schemas to support analytical and business needs
- Created interactive reports, **dashboards** and data **visualization** to monitor and analyze inventory levels, lead times and delivery performance
- Ensured data **security, privacy** and **governance policies** are in place and adhered to
- Reduced manual and repeatable system processes by 60% utilizing **Python** scripts to enable automation

Brightpoint Inc. | Solution Architect | Feb 2017 – April 2019

- Built servers using AWS, importing volumes, launching **EC2, RDS**, creating **security groups, auto-scaling** and **load balancers** in the defined virtual private cloud
- Created reusable **pipeline** templates, promoting consistency and efficiency across projects, reducing duplication of effort and ensuring standardized deployment practices
- Applied a lifecycle policy to optimize **cost savings** and data durability by transitioning infrequently accessed data to lower-cost storage tiers
- Implemented a strategy to optimize cost savings by purchasing and utilizing **Reserved EC2 Instances**
- Worked with business owners and stakeholders to design and implement shared cloud infrastructure
- Deployed multi-tier applications to AWS by creating a blueprint containing proper configuration such as versioning, layout, network volumes, subnets, backups, **security groups**, IAM roles and **AD Groups**

EDUCATION

Bachelor of Science – Petroleum Engineering

Texas Tech University, Lubbock, TX – College of Engineering
