

Dear Hiring Manager,

I am excited to apply for the Staff Data Engineer opportunity. With over 10 years of experience designing and scaling cloud-native data platforms across E-commerce, Finance, SaaS, AI/ML, and Healthcare domains, I have built reliable, high-performance systems that power real-time analytics and machine learning at enterprise scale. My expertise spans AWS, Snowflake, Databricks, Apache Spark, Kafka, dbt, and Terraform, with a strong focus on governance, streaming architectures, and ML-ready pipelines delivering measurable business impact.

Beyond technical execution, I bring Staff-level leadership and stakeholder alignment experience, partnering closely with engineering, product, data science, and compliance teams. I am motivated to contribute scalable, secure, and forward-looking data solutions that accelerate innovation and long-term platform growth.

Sincerely,
Humza Mahmud
