

AVINASH VARMA

DATA ENGINEER

USA | +1-(774)-518-2222 | avinashvarmakanumuri23@gmail.com | [LinkedIn](#)

SUMMARY

Data Engineer with approx. 4 years of experience building and optimizing large-scale batch and streaming data pipelines across healthcare and financial services. Strong expertise in Spark, Kafka, and AWS-based data platforms processing tens of millions of records daily. Proven track record in modernizing legacy ETL systems, improving performance, reliability, and cost efficiency. Experienced in delivering production-grade data solutions supporting real-time and analytical workloads.

TECHNICAL SKILLS

- **Core Data Engineering:** Data Modelling, ETL / ELT Pipelines, Data Lake & Data Warehouse Design, Data Quality & Validation Frameworks
- **Big Data & Streaming:** Apache Spark (PySpark), Apache Kafka, Hadoop Ecosystem, Spark SQL
- **Cloud Platforms:** AWS: S3, Glue, Athena, Redshift, EC2, IAM, Cloud-Native Data Lake Architectures
- **Databases & Storage:** Relational: PostgreSQL, MySQL, NoSQL: MongoDB, Data Warehouses: Amazon Redshift
- **Programming & Query Languages:** Python, SQL
- **DevOps & Workflow Orchestration:** Apache Airflow, CI/CD for Data Pipelines, Docker

WORK EXPERIENCE

Wells Fargo, USA | Data Engineer

Jun 2025 – Present

- Spearheaded the architecture and scaling of Spark batch and streaming pipelines processing 40M+ records daily, consistently meeting strict SLA and regulatory requirements for financial analytics.
- Orchestrated advanced Spark performance tuning initiatives across job design, partitioning strategies, and execution optimization, accelerating data availability for trading and risk decision-making.
- Implemented S3 partitioning and data layout optimizations, significantly improving query performance and reducing compute costs for large-scale analytical workloads
- Stabilized production data pipelines, reducing failures and reprocessing incidents by approximately 35% and significantly improving platform reliability.
- Institutionalized data quality, schema validation, and monitoring frameworks for compliance-critical datasets, strengthening platform reliability, audit readiness, and stakeholder confidence.
- Championed architectural and orchestration improvements across data platforms, reducing operational overhead while enhancing scalability and long-term maintainability.
- Served as the technical owner and strategic partner for cross-functional stakeholders (analytics, risk, compliance), translating complex business needs into production-grade, scalable data solutions.

Cigna Healthcare, USA | Data Engineer

Aug 2024 – Jun 2025

- Engineered cloud-native ETL pipelines to ingest and transform large-scale healthcare data, enabling analytics-driven insights and informed decision-making.
- Replatformed legacy batch workflows to Spark-based architectures, enhancing scalability, maintainability, and operational efficiency.
- Modelled and curated analytics-ready datasets to support BI, operational, and clinical analytics use cases.
- Coordinated with analysts and business stakeholders to ensure data usability, governance, and regulatory compliance in a highly regulated environment.

Miraicoders Technology, INDIA | Jr. Data Engineer

Jul 2021 – Jul 2023

- Implemented foundational ETL pipelines using Python, SQL, and Spark to ingest and transform large-scale operational datasets.
- Contributed to production data workflows by completing assigned development tasks with a strong focus on correctness, reliability, and documentation standards.
- Troubleshoot data pipeline issues and supported performance tuning efforts, gaining hands-on exposure to production-scale optimization.
- Engaged with cross-functional teams to gather data requirements and translate them into effective technical solutions.
- Cultivated strong fundamentals in cloud data platforms and production-grade data engineering best practices.

EDUCATION

Master of Science in Information Technology Management

Webster University – St. Louis, MO

Bachelor of Technology in Computer Science

B.V. Raju Institute of Technology – Hyderabad, India
