

DAVID JOHNSON

SENIOR DATA ENGINEER

✉ davidhqwhite@gmail.com | ☎ (315) 556-7637 | 🏠 New York, NY

PROFESSIONAL SUMMARY

Senior Data Engineer with strong **leadership, communication, ownership, and client-facing consulting** experience delivering **Microsoft-centric data engineering solutions**. Adept at architecting modern **Azure-based pipelines, dimensional models, data lakehouse patterns**, and scalable integrations with a focus on **data quality, reliability, automation, and security**. Proven track record mentoring teams, running design sessions, and translating business requirements into high-value, production-grade systems with a **growth mindset** and commitment to exceptional performance.

EXPERIENCE

Senior Data Engineer
Courtyard.io

May 2022 – Present

- Led architecture and delivery of enterprise analytics pipelines for Courtyard.io's creator-commerce ecosystem, implementing **Azure Data Factory, ADLS, Databricks, and Spark** to standardize multi-tenant ingestion and accelerate insights.
- Designed and optimized **dimensional models (star schemas)** powering marketplace revenue reporting and real-time creator engagement dashboards.
- Built metadata-driven ingestion pipelines integrating **OAuth 2 APIs**, flattening complex JSON payloads to SQL-ready structures and improving pipeline reliability.
- Implemented data lakehouse patterns combining curated bronze/silver/gold layers, enhancing security and lineage for customer analytics.
- Collaborated with BI, product, and cloud teams to implement scalable solutions aligned with business objectives, establishing documentation and diagram standards.
- Led design workshops with internal stakeholders, establishing best practices for modularity, observability, and automated quality checks.
- Mentored junior engineers, driving continuous improvement and consistent delivery practices.
- Championed client-style communication habits internally through clear documentation, predictable delivery, and proactive issue ownership.
- Supported long-term roadmap planning and cross-functional alignment for Courtyard.io's analytics strategy.

Senior Data Engineer
Mixpanel

Mar 2019 – Apr 2022

- Engineered scalable behavioral analytics pipelines at Mixpanel using **Azure Synapse, Spark, and SQL** during rapid customer growth.
- Developed orchestration frameworks that automated high-volume event ingestion workflows and improved anomaly detection and alerting.
- Designed star-schema data models supporting B2B expansion metrics, workspace adoption, and product conversion analytics.
- Improved pipeline automation and monitoring through metadata-driven design patterns.
- Collaborated with customer-facing teams to translate complex data requirements into robust engineering solutions.
- Created internal documentation and reusable patterns to standardize analytics development.

Data Engineer

Jul 2016 – Feb 2019

Druva

- Built customer health scoring pipelines inside Druva's SaaS data protection platform using **SQL, Azure SQL DB, and data integration frameworks**.
- Integrated telemetry, CRM, and support-case signals into unified analytics datasets supporting churn prediction and renewal forecasting.
- Constructed dimensional datasets enabling QBR insights and product adoption analytics.
- Developed API ingestion patterns normalizing JSON structures for downstream reporting.
- Partnered with product and success teams to gather requirements and deliver actionable data models.

EDUCATION

Master of Science / Computer Science

Aug 2010 – May 2016

California State University, East Bay

SKILLS

Programming: Python, SQL, PySpark, Scala

Azure Data Engineering: Azure Data Factory, Azure Databricks, ADLS, Synapse Analytics, Azure SQL Database, Fabric

Data Architecture: Data Lakehouse, Medallion Architecture, Dimensional Modeling, Star Schema Design, Metadata-Driven Pipelines

Data Integration: API Integration, OAuth 2, JSON Normalization, ETL/ELT Pipelines

Cloud & DevOps: Azure Cloud Services, Azure Networking Basics, CI/CD Pipelines, Infrastructure-as-Code Concepts

Data Quality & Governance: Data Validation, Observability, Monitoring, Security Principles, Access Controls

Analytics Engineering: Model Optimization, Performance Tuning, Reporting Models, Business Requirements Discovery

Collaboration & Leadership: Technical Mentorship, Design Workshops, Client Communication, Project Ownership

Tools & Platforms: Git, Databricks Workspace, Visualization Tools, Documentation & Diagramming
