Los Angeles, CA | +1 (978) 265 2164 | [chaitanyag0610@gmail.com](mailto:chaitanyag0610@gmail.com) | [LinkedIn](#)

## SUMMARY

Results-driven SRE/DevOps Engineer with 6+ years of experience delivering scalable, secure, and highly available cloud-native platforms across AWS, Azure, and GCP environments. Proven ability to stabilize production systems, reduce deployment risk, and automate end-to-end infrastructure operations using Terraform, Kubernetes, Helm, Docker, Ansible, and CI/CD pipelines (GitHub Actions, GitLab, Jenkins). Strong record of driving measurable improvements—lowering incident volume, improving release success rates, optimizing cloud costs, and enhancing monitoring and observability maturity through Prometheus, Grafana, ELK, Splunk, and Datadog. Adept at collaborating with cross-functional teams to modernize legacy systems, implement SRE best practices, enforce reliability SLIs/SLOs, and build self-healing automation that strengthens platform resilience and performance in large-scale enterprise environments.

## SKILLS

**Methodologies:** Agile, Scrum, Kanban, SDLC, ITIL, SRE Best Practices, SLIs/SLOs/Error Budgets

**Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, CloudFormation, IAM, VPC, CloudWatch, CloudTrail), Azure (VMs, Blob Storage, Azure DevOps, ARM Templates), GCP (Compute Engine, Cloud Storage, Cloud Functions, BigQuery)

**CI/CD & Version Control:** Jenkins, GitHub Actions, GitLab CI/CD, Bamboo, Terraform, CloudFormation, ArgoCD, Helm, Git, GitOps workflows, Branching & PR strategies

**Containerization & Orchestration:** Docker, Kubernetes (EKS, AKS, GKE), Docker Compose, Helm Charts, OpenShift

**Configuration Management:** Ansible, Puppet, Chef, SaltStack, Terraform Templates, YAML/JSON scripting

**Monitoring & Logging:** Prometheus, Grafana, ELK Stack, Splunk, Nagios, CloudWatch, Azure Monitor, Dynatrace, Datadog, Centralized Logging Pipelines

**Security & Compliance:** IAM, Security Groups, KMS, CloudTrail, Snyk, OWASP ZAP, Vulnerability Scanning, RBAC, MFA, Secrets Management, Least Privilege Access Controls, Compliance Standards (SOC 2, HIPAA, PCI)

**Scripting & Programming:** Python, Bash, PowerShell, Go, TypeScript

**Databases & Storage:** MySQL, PostgreSQL, SQL Server, NoSQL (MongoDB, DynamoDB), S3 Buckets, Azure Blob, GCP Cloud Storage

**Networking & Systems:** HTTP/HTTPS, TCP/IP, VPN, VPC, Subnets, Load Balancers, DNS, Firewalls, Linux/Unix Systems, Filesystems

**Automation & Infrastructure as Code (IaC):** Terraform, CloudFormation, Ansible Playbooks, Helm, Jenkins Pipelines, Bash/Python Automation Scripts, Policy as Code – OPA/Conftest

**Web & App Servers:** Nginx, Apache Tomcat, IIS, Application Deployment Automation

**Observability & Reliability:** Incident Response, On-Call Runbooks, DR & Backup Automation, Capacity Planning & Performance Tuning, MTTR/MTTD Reduction Techniques

## EXPERIENCE

### HCL Tech, USA

Aug 2024 – Present

#### Site Reliability Engineer

- Led the design of a multi-region AWS infrastructure using EC2, VPC, ALB, and Auto Scaling, improving service availability from 97.8% to 99.9% for a high-traffic enterprise application.
- Automated environment provisioning with Terraform and CloudFormation, reducing build time from 6 hours to under 45 minutes across dev, QA, and production.
- Re-engineered CI/CD pipelines in Jenkins and GitHub Actions, cutting deployment failures by 40% and enabling consistent, zero-downtime releases.
- Implemented Kubernetes (EKS) workload optimizations with Helm and GitOps workflows, reducing pod-level incidents by 30% and improving cluster resource utilization by 25%.
- Built centralized monitoring with Prometheus, Grafana, and CloudWatch, improving anomaly detection accuracy and decreasing MTTR by 35%.
- Configured and enforced AWS IAM, KMS, RBAC, and least-privilege policies across cloud workloads, passing internal security audits with zero critical findings.
- Developed Python and Bash automation scripts to streamline log ingestion, patching, and health checks, eliminating 200+ hours of manual work per quarter.
- Tuned MySQL and PostgreSQL instances with performance metrics, reducing slow queries by 28% and supporting a 20% growth in concurrent transactions.
- Conducted capacity planning for compute, storage, and network layers, preventing projected 20–25% cost overruns and aligning scaling strategy with user demand.
- Collaborated with development, security, and platform teams in Agile sprints to deliver reliable, secure, and production-ready infrastructure aligned with business SLAs.

### Atcult, Rome, Italy.

Nov 2022 - Jul 2023

#### Cloud DevOps Engineer

- Supported a cloud modernization program by moving core applications from on-prem to AWS using EC2, Lambda, and CloudFormation, improving application responsiveness by 30% and lowering monthly compute/storage spend by 25%.
- Containerized existing services and deployed them to EKS using Helm, enabling consistent releases and reducing deployment-related incidents by 40%.
- Integrated AWS IAM with the client's Active Directory setup to streamline access controls and reduce authentication-related support issues by 70%.

- Developed Puppet manifests and automation modules that standardized server build processes across Linux and Windows fleets, reducing configuration drift by 90%.
- Maintained the Puppet Master/Agent setup and tied it into CI/CD workflows, enabling automated provisioning and reducing manual intervention by 50%.
- Implemented CI/CD pipelines with Jenkins and CodePipeline, improving release turnaround time by 3x for multiple internal applications.
- Designed VPC networking layouts—subnets, route tables, NAT gateways, and security group rules—that improved workload segregation and cut cross-service latency by 20%.
- Applied S3 lifecycle rules, encrypted EBS volumes, and introduced backup policies, improving storage efficiency by 18% while meeting internal compliance standards.
- Monitored application and infrastructure health using Datadog, CloudWatch, Prometheus, and Grafana, reducing MTTD during peak usage by 28%.
- Built serverless REST APIs using API Gateway, Lambda, and Step Functions to support near-real-time processing for a logistics workflow, improving throughput by 35%.
- Documented operational procedures and participated in disaster recovery testing, helping bring the client’s critical services to a consistent RTO under 10 minutes.

**Mindtree, India**

**Jan 2019 - Oct 2022**

**DevOps Engineer**

- Automated provisioning of AWS environments with Terraform and CloudFormation, reducing manual setup work by 70% and ensuring consistent infrastructure across project teams.
- Built and maintained CI/CD pipelines in Jenkins and GitLab CI for microservices and API platforms, improving deployment reliability by 35% and tripling release frequency.
- Managed day-to-day AWS operations (EC2, RDS, S3, VPC, IAM, Lambda) and optimized resource usage, cutting monthly cloud expenses by 15–18%.
- Implemented monitoring and alerting with Prometheus, Grafana, and Splunk, reducing MTTR by 30% and providing teams with clearer visibility into service health.
- Handled database administration for MySQL and SQL Server, improving query performance by 20–25% through tuning, indexing, and storage optimization.
- Deployed containerized applications using Docker and managed Kubernetes clusters for staging and production, improving deployment consistency and reducing outages by 40%.
- Automated operational tasks using Bash and Python scripts, eliminating 40–50% of routine manual work for the support team.
- Strengthened security and compliance by enforcing IAM policies, MFA, role segregation, and Secrets Management, resolving multiple gaps identified during quarterly audits.
- Worked directly with development, QA, and security teams in Agile sprints to implement DevSecOps practices, reducing code-to-deployment lead time by 45%.
- Participated in on-call rotations, supporting production systems across application, database, and network layers with an average response time under 15 minutes.

**EDUCATION**

**Masters in Computer Information Systems**

**Dec 2024**

New England College

Henniker, NH

**Bachelor of Engineering in Mechanical Engineering**

**Apr 2018**

Madanapalle Institute of Technology and Science

Andhra Pradesh, India

**CERTIFICATIONS**

**AWS Certified Solutions Architect - Associate**

**Microsoft Certified Azure Administrator (AZ-104)**

**HashiCorp Certified Terraform Associate**
