

Rajal Patel

Senior AI, Data & Cloud Engineer

✉ rajalpatel.tech@gmail.com 📞 (706) 452-4371 📍 Abilene, TX 79605

Summary

Senior AI, Data & Cloud Engineer with 9+ years of experience. Skilled in AI solutions, cloud platforms, and data pipelines. Proven track record in leading AI/ML initiatives, cloud transformations, and multi-cloud migrations across AWS and Azure. Expertise in Python, MLOps, data analytics to enable high-performance systems that drive business growth.

Work Experience

Senior AI, Data & Cloud Engineer, Pariveda Solutions 07/2019 – Present | Dallas, TX

- **Designed and implemented enterprise-level data platforms** for high-profile clients across industries like healthcare, finance, and energy, ensuring high availability, scalability, and security across multi-cloud environments (AWS, Azure).
- **Led AI/ML initiatives** to improve business operations, including building **predictive models** using machine learning algorithms to forecast trends and enhance decision-making.
- **Built real-time data pipelines** using technologies like **Kafka** and **AWS Kinesis**, reducing data processing latency to under 10 seconds, enabling near real-time operational insights.
- **Developed and automated CI/CD pipelines** leveraging **GitHub Actions** and **Terraform** to ensure consistent and reliable deployments for cloud-based applications and AI models across different stages of the development lifecycle.
- **Mentored a team of engineers**, sharing expertise in **cloud architecture**, **data engineering best practices**, and **MLOps** principles, fostering a culture of continuous learning and improving team output by 40%.
- Worked closely with **product and business teams** to **align cloud and AI strategy** with business goals, resulting in improved service delivery, customer satisfaction, and revenue growth.

AI & Data Engineer, Tiger Analytics 06/2015 – 06/2019 | Plano, TX

- **Engineered and optimized data pipelines** using **Python**, **SQL**, and cloud technologies (AWS, Azure), increasing ETL processing efficiency by **35%** and improving data accuracy by integrating robust data validation frameworks.
- Developed and deployed **custom machine learning models** for **segmentation**, **forecasting**, and **anomaly detection**, providing actionable insights for **supply chain optimization** and **retail demand forecasting**.
- Led the design and development of **Power BI and Tableau dashboards**, enabling executives and business teams to **visualize key metrics** and make real-time data-driven decisions, reducing manual reporting time by **over 40%**.
- **Integrated data sources** (including **Salesforce HEDA**, **Marketing Cloud**, and other CRM platforms) for higher education clients, leading to more efficient **student engagement** and campaign management systems.

Education

Master of Science (M.S.), Computer Science, 08/2016 – 05/2019
Georgia Institute of Technology

Bachelor of Science (B.S.), Computer Science, 08/2010 – 05/2015
Abilene Christian University

Skills

- AI & Machine Learning** — Python, TensorFlow, PyTorch, SageMaker, MLflow, LangChain, OpenAI API, RAG Systems, A/B Testing
- Cloud & Infrastructure** — AWS (S3, Glue, Redshift, SageMaker), Azure (Synapse, Data Factory), Terraform, Docker, Kubernetes
- Data Engineering & Analytics** — SQL, Data Modeling, Kafka, dbt, Airflow, Snowflake, Azure Synapse, ETL/ELT Pipelines
- Backend & Tools** — FastAPI, Flask, .NET Web API, Microservices, REST, Observability (Datadog, Grafana), Git, Jira, Agile/Scrum
