Cloud Architect/Hadoop Architect /Tech lead/Sr. dev/AWS solution architect

Professional Summary:

Senior Data Engineer and Cloud Big Data Architect with 16+ years of experience designing and implementing scalable, production-grade data platforms across AWS, Azure, and GCP. Expert in building modular ETL/ELT pipelines using Apache Spark, PySpark, Python, Sql with a strong emphasis on data reliability, governance, observability, and automated quality validation. Proven success delivering data models and lakehouse solutions for financial and healthcare organizations, driving actionable insights and operational efficiency. **AWS Certified Solutions Architect** and **Dremio Lakehouse Associate** with hands-on expertise in HDFS, Spark, EMR, and modern BI visualization tools. Adapt at leading engineering teams through solution design trade-offs, incident response, stakeholder collaboration, and communication skills to drive end-to-end cloud-native data initiatives from concept to production.

Skills Summary:

Programming Languages	Java, Python, Scala
Databases	Oracle 10g, MySQL, PostgreSQL
Big Data Technologies	Hadoop, Hive, Impala, Spark, Kafka, Sqoop, NiFi, ELK Stack, Snowflake, Iceberg.
Cloud Services	AWS (EMR, S3, SQS, Lambda, Glue, Athena, Presto), Google Cloud(Big Query, Dataproc), Azure (ADF, Databricks), dbt, Dagster
GenAI	Gen AI,LLMs, Agentic AI, Flowwise
NoSQL Databases	Cassandra, HBase
Dev-Ops and Monitoring	Jenkins, Argo CD, Teraform,K8s,Prometheus and Grafana
Frameworks	Spring, Hibernate, Play
Operating Systems	Linux, UNIX, Windows
IDEs & Tools	Cursor, Eclipse, IntelliJ, PyCharm, VS Code

Professional Experience:

PNC, US – PA

Sep2022 to till date

Data Architect

Roles and Responsibilities:

- Involved Solution/Data Architect designing and developing Ingestion and operational solutions for PNC data.
- Designed data solutions (Data Lakes, ODS, Data Warehouses, Data Marts etc.) for analytics and operations to support the company's .
- Oversaw EDW migration and modernization initiatives, handling massive amounts of legacy, external, and 3rd party business data on several platforms .
- Developed entity resolution and Search-Match systems using proprietary logic in Java and Scala, that facilitate network coverage analysis for providers and business entities.
- Worked on writing **FICO processing xml data using java pipe line for ingesting data**.
- Ingesting and processing PEGA marketing cloud data for customer analytics.
- Accessing data in **S3** using **Athena & Presto**. Implemented **event base solution using lambda, SQS** for executive reporting.

- Spinning an **EMR** based using input put from **lambda**.
- Developed **python-based** consumption process to consume data from pulser topic.
- Developed and maintain enterprise data architecture, logical data models, and physical designs for data ingestion.
- Experience with spring boot, micro services.
- Worked closely with release and deployment.
- Developed and maintain enterprise data architecture, logical data models, and physical designs for data ingestion.
- Involved in system, manual testing while integrating with different data integration pipelines.
- Involved in build and deployment activities process definitions, working with team.

Capital one, US – VA

May 2021 to Sep 2022

AWS Hadoop Architect

Guide well Solutions – Jacksonville, FL

Jan 2019 to Apr 2021

AWS Hadoop Architect

Roles and Responsibilities:

- Involved Solution/Data Architect designing and developing analytical and operational solutions including Data Lakes, Operational Data Stores (ODS), Data Warehouses, and Data Marts and RDBMS
- Involved Enterprise Data Warehouse (EDW) Modernization/Transformational/Migration Projects.
- Involved implementing Data Lakes and analytical solution in the Cloud (AWS, S3, and Google) and cloud-based analytic platforms.
- Implemented Hadoop-based and Cloud-based technologies for data ingestion, data storage, data integration.
- Developed and maintain enterprise data architecture, logical data models, and physical designs for data solutions on both Hadoop and RDBMS.
- Implemented Web service calls for Different data integrations.
- Implemented POC for Entity resolution using Reltio.
- Preparing Design Documents (Request-Response Mapping Documents, Hive Mapping Documents).

Equifax, Atlanta GA

April 2018 to Dec 2018

AWS Big data Architect

Manheim, Atlanta GA

Feb2016 to April 2018

AWS Hadoop Architect

Accenture, Remote

Nov2015 to Jan 2016

Hadoop Architect

The Home Depot, Atlanta GA

May 2015 to Oct 2015

Hadoop Architect

AT&T, Atlanta GA

Jul 2014 to Apr 2015

Java/J2ee-sr. Big data Consultant/Lead

The Home Depot, Atlanta GA

Jan 2013 to June 2014

Hadoop Architect Lead

Tech Mahindra, US, India

Mar 2010 to Dec 2012

Sr. J2ee-Hadoop Developer Lead

Hewlett-Packard Global soft,India

Aug 06 to Mar 2010

Java/J2ee Developer

Education:

Andhra University

Jan 2007 - Dec 2008

Master of Business Administration (M.B.A.), International Business

Andhra University

Jan 2000 - Dec 2004

Bachelor of Engineering (B.E.), Electrical and Electronics Engineering

Certifications

- Dremio Verified Lakehouse Associate
- AWS Certified Solutions Architect – Associate
