Data Science & Information Systems Professional

PROFESSIONAL SUMMARY

Highly strategic and technically proficient professional with 9+ years of progressive experience in Data Governance, Business Intelligence, and Enterprise System Architecture, primarily within the Logistics and Healthcare industry. Holds an MBA in Business Intelligence & Analytics Management and a foundational BS in Computer Information Systems. Proven expertise in translating complex business outcomes into architectural blueprints, managing Cloud/Azure environments, and establishing robust governance frameworks for data quality, security, and lineage. Seeking to leverage deep experience in regulatory compliance, emerging technology research, and multi-stakeholder consensus to excel as an AI Governance Manager. Meets and exceeds minimum qualifications, including 7 years of related work experience and extensive experience in the preferred areas (Agile, HIPAA/Healthcare).

CORE COMPETENCIES

Domain Expertise	Technical Strategy & Architecture	Governance & Compliance
Healthcare/PBM Domain (EHR, Epic, Cerner)	Enterprise Architecture (EA)	Data Governance & Stewardship (Purview, Profisee)
Business Intelligence & Analytics	Solution Blueprint Development	Regulatory Compliance (HIPAA, PCI Principles)
Emerging Technology Research	Cloud Architecture (Azure Data Lake/Warehouse)	Architecture Assurance Modeling
Stakeholder Engagement & Consensus	Systems Design & ETL Development (T-SQL)	Policy Definition & Enforcement
AI/ML Ops Principles	Agile/Product Delivery Model	Technical Debt Remediation

TECHNICAL SUMMARY

Data Governance: Purview, Data Lineage/Quality, Data Migration, Metadata Management.

Cloud/RDBMS: Azure Data Lake, Azure Data Warehouse, MS SQL Server, PostgreSQL, MySQL, Microsoft One Lake.

Programming: Python, R, SQL, T-SQL, DAX

BI & Analytics: Power BI, Tableau, Google Data Studio, Microsoft Fabric, Cognos

EHR Systems: EPIC, Cerner, eCW, Centricity.

Project Mgmt: Smartsheet, ServiceNow, Agile/Scrum

PROFESSIONAL EXPERIENCE

Lead Data Specialist (Remote Contractor) | TROD Tech LLC., GA | 01/2021 – Present

- Consulted on several data science and data engineering contracts, advising on data governance and architecture best practices to ensure compliance.
- Designed, developed, and maintained ETL/ELT pipelines using Azure Data Factory to automate data workflows and integrations.
- Built and optimized data models and stored procedures in Microsoft SQL Server to improve data accessibility and performance.
- Developed and maintained scalable data transformations using Azure Databricks (Spark, PySpark) for advanced analytics and processing.
- Ingested, processed, and integrated data from multiple sources including relational databases, APIs, and flat files to support diverse business requirements.
- Optimized query performance, data storage, and pipeline execution for efficient and reliable data delivery.
- Ensured data quality, reliability, and consistency across data platforms by implementing validation and cleansing processes.
- Implemented monitoring, logging, and error handling for data pipelines to enhance operational visibility and troubleshooting.
- Collaborated with data analysts, BI developers, and stakeholders to support reporting and analytics needs, ensuring alignment with business objectives.
- Documented data flows, transformations, and technical designs to facilitate knowledge sharing and maintainability.
- Followed security, governance, and compliance best practices throughout the data engineering lifecycle.

System Hardware Analyst (Consultant) | Optimum Healthcare IT | FL. 11/2023 – 05/2025

- Conducted comprehensive gap analyses on existing documentation to inform hardware analysis, optimizing product quantities and deployment for endpoint systems.
- Applied detailed analytical skills to interpret complex data for informed configuration decisions within a hospital setting utilizing Epic, demonstrating practical knowledge of **HIPAA** environments and clinical unit requirements.

Data Analyst | Morehouse School of Medicine | GA 01/2021 – 10/2022

- Conducted in-depth data analysis on COVID-19 trends and provided tailored reports using BI tools (PowerBI, Tableau).
- Assisted in surveys and managed institutional databases for reporting and decision-making.
- Developed automated reporting frameworks using PowerBI, MS Excel, and SQL Server to streamline processes.
- Created intuitive visualizations to identify patterns and trends in metrics for executive understanding.
- Contributed to research projects, preparing reports using various data resources.
- Participated in enrollment management, accreditation, and institutional planning processes.
- Skilled in advanced Excel features (Power Query, Pivot Table, Functions) and project management tools (Smartsheet).

Implementation Specialist | National Spine & Pain Centers | NJ. 08/2017 – 04/2018

- Collaborated on the successful implementation of PM and EHR software (EMA, Centricity), providing support for clinical operations, data migration, and testing across multiple sites.
- Conducted pre-implementation technical dress rehearsals and participated in the review of major releases and upgrades, evaluating new functionality and master file changes against established standards (Architecture Assurance Model).

Health Informatics Consultant (Contract) | Independent Consultant | Nationwide 07/2015 – 11/2018

- Provided comprehensive training and support on Electronic Health Record (EHR) systems (EPIC and Cerner), facilitating successful implementations across diverse healthcare organizations and ensuring system adherence to patient data security protocols.

- Assisted with extraction, transformation, and integration of health care data, collaborating with teams to establish data formatting and cleaning guidelines essential for regulatory reporting.

EDUCATION

Master of Business Administration (MBA) *Business Intelligence and Analytics Management*
Keller Graduate School of Management, IL.

Bachelor of Science (BS) *Computer Information Systems (CIS) – Database Management Concentration*
DeVry University, North Brunswick, NJ

CERTIFICATION

Microsoft Azure (Microsoft Certified: Azure Data Scientist Associate).	Jun. 2023
Microsoft Azure (Microsoft Certified: Azure Data Engineer Associate).	Sep. 2022
LinkedIn Learning (Smartsheet Essential Training).	Jan. 2021
IBM (Data Analysis Using Python).	Jul. 2020
IBM (Data Visualization with R).	Mar. 2020
Simplilearn (Data Science with R).	Mar. 2020
International Scrum Institute (Scrum Product Owner Accredited Certification).	Jun. 2019
International Scrum Institute (Scrum Master Accredited Certification).	May 2019

DEDICATED MEMBERSHIP

DAMA.

Data Governance Institute.
