SUMMARY

Senior Data Engineer with nearly **10 years** of experience designing scalable cloud data platforms across supply chain, energy, and finance domains. Proven in **Azure, Python, Spark, and SQL**, delivering cost reductions, performance gains, and production-grade analytics enabling data-driven business decisions.

SKILLS

Programming & Scripting: Python, SQL, PySpark, R, Bash

Data Engineering & Architecture: ETL / ELT Pipelines, Lakehouse Architecture, Data Warehousing, Dimensional Modeling, Slowly Changing Dimensions, Data Quality Frameworks, Metadata Management, Schema Design

Cloud & Big Data Platforms: Microsoft Azure, Azure Synapse Analytics, Azure Data Factory, Azure Databricks, Azure Data Lake Storage, Azure Fabric, Spark

Databases: SQL Server, PostgreSQL, MySQL, Azure SQL

DevOps & Automation: CI/CD Pipelines, Azure DevOps, Infrastructure Optimization, Cost Management, Monitoring & Logging

Analytics & Visualization: Power BI, Tableau, DAX, Semantic Modeling

APIs & Integration: REST APIs, OAuth Authentication, External Data Integrations

EXPERIENCE

Konnectic Energy – AI-Powered Energy Market Analytics Platform

Senior Data Engineer

Aug 2025 – Present

- Architected a scalable **time-series data platform** using **Python, Azure Databricks, and Azure Data Lake**, processing 1.7M+ energy pricing records to support real-time analytics and trading decisions.
- Designed and deployed 10+ automated **ETL pipelines** using **Python, REST APIs, and Azure Data Factory**, improving external data availability and reducing manual data preparation effort by **40%**.
- Implemented structured **data validation** and **quality checks** using **Python frameworks**, achieving 96.5% data accuracy and significantly increasing stakeholder confidence in market analytics outputs.
- Developed a secure **RESTful analytics API** using **Python** and authentication controls, enabling external access to curated datasets and accelerating downstream BI and analytics integration.
- Established automated **CI/CD testing pipelines** with extensive integration tests, reducing deployment risks and ensuring consistent delivery of reliable data services.
- Optimized **data storage, compression, and lifecycle policies**, lowering infrastructure costs while maintaining high-performance access for near real-time analytics workloads.
- Partnered closely with founders and product stakeholders to translate evolving business requirements into scalable **data architecture**, accelerating analytics-driven feature delivery.

McLane Company

Senior Data Engineer

Temple, TX

Mar 2023 – Oct 2024

- Designed and deployed enterprise-scale **ETL pipelines** using **Azure Data Factory** and **Azure Synapse**, improving data processing throughput by 30% while reliably supporting downstream analytics and machine learning workloads.
- Led migration of legacy on-prem **data warehouses** to **Azure Synapse Analytics**, enabling elastic scalability and delivering a 22% reduction in annual infrastructure and maintenance costs for enterprise reporting systems.
- Optimized large-scale **PySpark** transformations in **Azure Databricks**, reducing job runtimes and enabling near real-time reporting capabilities for logistics, inventory planning, and operational analytics teams.
- Built a centralized data quality framework using **Python** and **SQL**, reducing pipeline failures by 25% and significantly improving trust and reliability of enterprise analytics outputs.
- Partnered with data science teams to productionize models using **Azure ML** and **Databricks**, ensuring scalable data pipelines and reliable feature availability for demand forecasting and predictive analytics use cases.
- Implemented standardized **feature engineering pipelines**, ensuring consistent datasets across development, testing, and production environments while reducing rework and accelerating model deployment cycles.
- Aligned curated **Synapse semantic layers** with **Power BI models**, improving dashboard performance and driving higher adoption among business users and operational stakeholders.
- Mentored junior engineers on **Azure architecture, SQL optimization, and deployment best practices**, strengthening engineering standards and improving overall team delivery velocity.

Data Engineer / Analytics Engineer

Mar 2020 – Mar 2023

- Architected a pre-validation **data warehouse** using **SQL Server, Azure Synapse, and automated ETL pipelines**, improving upstream data accuracy by 29% for analytics and data science teams.
- Built reusable **feature engineering frameworks** using **Python** and **R**, accelerating experimentation, improving consistency of

derived features, and reducing development cycles across multiple analytics initiatives.

- Integrated curated datasets into operational workflows using **Power BI** and **SQL**, contributing to an 8% reduction in overall supply chain operational costs through improved visibility and decision-making.
- Automated recurring reporting pipelines using **SQL** and **Python**, reducing report delivery timelines from days to hours and significantly improving responsiveness to evolving business requirements.

Business Intelligence Developer / Analytics Engineer

May 2017 – Mar 2020

- Designed enterprise **data warehouse schemas** using **SQL**, **dimensional modeling**, and standardized business definitions, enabling consistent analytics foundations and supporting downstream reporting and advanced analytical use cases.
- Developed executive-level dashboards using **Power BI**, **Tableau**, and optimized **DAX calculations**, providing real-time visibility into revenue, logistics performance, and operational KPIs for senior leadership.
- Automated recurring operational and financial reports using **SQL-based datasets** and scheduled refresh processes, reducing manual reporting effort and accelerating delivery timelines from days to hours.
- Partnered cross-functionally with finance, logistics, and operations teams to standardize **KPI definitions** and reporting logic, improving data trust and ensuring consistent metrics across enterprise dashboards.

EDUCATION

M.S. in Data Science – Syracuse University

B.S. in Business Computer Information Systems – University of Mary Hardin-Baylor
