

LOUIS OSEMWOTA

Richmond, TX | 832-732-3895 | Louisosemwota@gmail.com

PROFESSIONAL SUMMARY

Senior Data Engineer Consultant with 10+ years of experience architecting enterprise Microsoft data solutions and modern lakehouse environments. Expert in designing metadata-driven ETL/ELT pipelines using Azure Data Factory and Synapse Analytics to transform complex JSON and API sources into optimized star schemas. Proven leader in driving data strategy and roadmaps, mentoring engineering teams, and delivering scalable architectures that integrate Azure Databricks, Spark, and SQL Server to solve critical business problems with 99.9% reliability.

TECHNICAL SKILLS

- **Data Engineering & Orchestration:** Azure Data Factory (ADF), Azure Databricks, Spark, Synapse Analytics, Microsoft Fabric, Apache Airflow, dbt (Data Build Tool).
- **Cloud Platforms & Infrastructure:** Azure (ADLS Gen2, Azure SQL, Key Vault), AWS (RDS, S3), Modern Data Lakehouse Architecture.
- **Databases & Data Warehousing:** SQL Server (2008–2019), Snowflake, Dimensional Modeling (Star/Snowflake Schemas), T-SQL (Advanced), MySQL.
- **Data Integration & Development:** API Ingestion (OAuth 2.0), JSON Flattening/Normalization, Python, PowerShell, Metadata-driven Frameworks.
- **BI & Analytics:** Power BI, SSRS, SSIS, SSAS, Data Governance, Quality Assurance.
- **Leadership & Project Management:** Solution Architecture, Technical Mentorship, Agile/Scrum, Stakeholder Management, Requirements Discovery.

PROFESSIONAL EXPERIENCE

CIGNA – New York, NY

Senior Advisor, SQL Server Data Engineer | Sep 2021 – Present

- Architected enterprise data strategies for 40+ production instances, aligning technical roadmaps with healthcare business objectives to achieve 99.9% system availability.
- Engineered automated data pipelines using PowerShell and SQL Agent to process 500M+ daily transactions, reducing manual processing latency by 35%.
- Led cross-functional design sessions with 10+ application teams to implement scalable database models and security standards across 200+ user roles.
- Developed a proactive monitoring and notification framework that reduced critical production incidents by 30% through advanced T-SQL and diagnostic DMVs.
- Mentored a team of 5 junior engineers on best practices for performance tuning and metadata management, increasing team velocity by 20%.
- Managed the end-to-end delivery of mission-critical data migrations for 50+ TB of healthcare data, ensuring 100% data integrity and zero downtime.

SILVERGATE BANK – La Jolla, CA

Senior Data Engineer | Jun 2020 – Aug 2021

- Designed and implemented modern data orchestration pipelines in Azure, migrating 10+ legacy databases to Azure SQL and AWS to improve scalability by 200%.
- Integrated 25+ diverse data sources via API ingestion and OAuth 2.0, standardizing complex JSON structures into relational SQL formats for executive reporting.
- Developed 15+ Power BI dashboards using optimized dimensional models (Star Schemas), providing leadership with real-time visibility into \$2B+ in daily financial transactions.
- Optimized complex T-SQL transform logic and indexing strategies, resulting in a 40% reduction in report latency and a 25% gain in server CPU efficiency.
- Authored comprehensive technical documentation and architectural diagrams to champion data governance, resulting in zero major findings during annual regulatory audits.
- Resolved critical data quality issues by implementing automated validation checks, ensuring 100% accuracy in financial reporting pipelines.

DXC TECHNOLOGY – Dallas, TX

SQL Server Data Infrastructure Engineer | Jun 2018 – May 2020

- Managed an enterprise data estate of 50+ TB across 60+ SQL Server instances, delivering high-performance solutions for 10,000+ global users.
- Led 100+ large-scale database upgrades and migrations using metadata-driven techniques, maintaining 100% SLA compliance for all maintenance windows.
- Implemented Always On Availability Groups and clustering to provide robust disaster recovery and 24/7 reliability for mission-critical workloads.
- Refactored legacy ETL processes using the Ola Hallengren framework, improving query efficiency by 50% across VLDB environments and saving \$40k/year in hardware overhead.

INFOSYS – Dallas, TX

Database Administrator & Data Specialist | Feb 2015 – May 2018

- Orchestrated 18+ server migrations across PROD, DEV, and UAT environments, reducing recovery time objectives (RTO) by 40%.
- Tuned high-volume data streams using SQL Profiler and PerfMon, eliminating bottlenecks in real-time analytics for 4 distinct business units.
- Supported high-availability architectures including mirroring and log shipping to ensure zero data loss for enterprise-scale financial systems.

CERTIFICATIONS

- **Microsoft Certified: Azure Database Administrator Associate**
- **Microsoft Certified: Azure Administrator Associate**
- **AWS Certified Solutions Architect – Associate**

EDUCATION

- **Bachelor of Science in Electrical / Computer Engineering** | Ambrose Alli University
