

PROFESSIONAL SUMMARY

Experienced Data Engineering and IT Leader with 13+ years in delivering enterprise-scale data and analytics solutions across industries, including healthcare, banking, telecom, retail, and GIS. Expertise in data warehousing, ETL/ELT, data modeling (Star/Snowflake), system architecture, and integration (REST/SOAP). Skilled in leading cross-functional teams on cloud platforms (Snowflake, Azure, AWS, Salesforce) and driving initiatives using Agile and Waterfall methodologies. Proven track record of aligning technical execution with business goals, particularly in healthcare, pharmaceuticals, banking, telecom, and energy sectors. Key contributor in bridging collaboration between Data Engineering and Application Development teams.

TECHNICAL SKILLS

MS SQL SERVER (T-SQL) | MS AZURE CLOUD | SAP | SALESFORCE | MICROSOFT DYNAMICS | MS GREAT PLANES | DATA WAREHOUSE | DATA LAKE | SNOWFLAKE | MS SQL SERVER INTEGRATION SERVICES (SSIS / DTS) | MS ACCESS | COMPUTING SERVICES (ADF / AZURE DATA FACTORY) | CLEO | MS SQL SERVER REPORTING SERVICES (SSRS) | TABLEAU | POWER BI | NETSUITE | HUBSPOT | SQL SERVER | ORACLE | CUSTOMER DATABASE | POWER BI | CRM DATA | SALESFORCE | UNDERSTANDING OF GEO LOCATIONS AND GEO FENCING | REDGATE | GIT | MS VISUAL STUDIO | UNIX | POWER SHELL

PROFESSIONAL EXPERIENCE

Evonsys

Data Modeler / Database Architect

05/2025 – Current

- Designed enterprise-style database schemas from requirements analysis through implementation lifecycle.
- Created conceptual, logical, and physical data models using ER modeling tools and translated them into production-ready DDL scripts using ER Studio.
- Migrated legacy schema from **Microsoft SQL Server to PostgreSQL**, including refactoring datatypes, procedures and involve in data migration.
- Applied normalization, dependency analysis, and schema refactoring to eliminate anomalies and enforce ACID-compliant design.
- Modeled structured datasets for analytics pipelines, enabling efficient aggregation and reporting queries.
- Automated schema deployment and identity reset processes using SQL scripting and database utilities.
- Collaborated with development teams to align backend data architecture with application-layer APIs for Pega environment.
- Designed migration scripts to move and validate datasets while maintaining transactional consistency.

NexKey

LEAD DATA ENGINEER

07/2024 – 05/2025

- Conducted thorough post-project evaluations and spearheaded continuous improvement initiatives to optimize project management processes and outcomes.
- Led the integration of the NexKey solution with the LockT automated security locking system, deployed across multiple universities.
- Developed and implemented data integrations and APIs to provide a unified interface for various digital lock platforms.
- Designed, built, and maintained ETL workflows using SSIS and Azure Data Factory (ADF) to ingest and process usage data from mobile locks and logs.
- Migrated legacy ETL pipelines to an incremental delta-based architecture, significantly enhancing performance and reducing load times.
- Optimized complex stored procedures and SQL scripts to improve data processing efficiency and system responsiveness.
- Supported the migration of legacy MySQL databases to Microsoft SQL Server, ensuring data integrity and minimal downtime.

- Converted existing code-based data integrations to SSIS packages, and managed job sequencing to ensure reliable and orderly data processing workflows.

**Beauty Health (former as HydraFacial)
DATAWAREHOUSE ENGINEERING**

10/2021 – 07/2024

- Led the modernization of a legacy data warehouse into a scalable, cloud-based architecture using Snowflake, enabling advanced analytics and seamless client-facing reporting.
- Designed and implemented end-to-end data integration pipelines using Azure Data Factory (ADF), SSIS, and CLEO, orchestrating data movement from internal and third-party systems.
- Developed custom integration frameworks for HubSpot, NetSuite, and SharePoint, ensuring reliable data synchronization across marketing, finance, and operations.
- Migrated client data from MS Access to SQL Server using Integration Services, improving data reliability, performance, and accessibility.
- Partnered with cross-functional teams (engineering, QA, manufacturing, business stakeholders) to define project scope, objectives, and technical deliverables.
- Led requirements workshops and executive demos, translating business needs into scalable data architecture and analytics solutions.
- Established enterprise-grade data validation, reconciliation, and governance processes to ensure data integrity, compliance, and trusted reporting.
- Delivered clean, production-ready data pipelines for Power BI and Tableau, supporting quarterly earnings, financial performance reporting, and real-time operational monitoring while optimizing cloud costs.

**ONIS SOLUTIONS Charter Spectrum
DATABASE ARCHITECT**

11/2018 – 10/2021

- Led the transformation of Charter Spectrum's legacy data environment into a modern Microsoft Azure cloud-based data platform, improving reporting speed, accessibility, and reducing long-term operational costs.
- Architected and developed enterprise-scale ETL solutions using IBM DataStage, integrating data from SQL Server, Oracle, MS Access, flat files, and other systems into a centralized data warehouse.
- Directed large-scale data consolidation efforts following a major merger, building high-performance DataStage jobs to ensure data accuracy, scalability, and unified reporting.
- Designed and implemented a centralized enterprise data warehouse integrating Microsoft Dynamics 365 and legacy transactional systems, enabling executive dashboards and operational analytics through Power BI.
- Led cross-platform web and mobile application development using Azure and .NET Core, introducing a microservices architecture to improve scalability, flexibility, and maintainability.
- Implemented CI/CD pipelines using Azure DevOps, reducing deployment cycles, minimizing manual errors, and accelerating release timelines.
- Established performance optimization initiatives that enhanced database efficiency, reduced processing time, and improved user experience across enterprise applications.
- Managed budgets, vendor relationships, and cross-functional teams, acting as a strategic liaison between business and technology stakeholders to deliver scalable, compliant, and business-aligned solutions.

**S-CUBE TECHNOLOGIES Kroger Specialty Pharmacy
DATA ENGINEERING**

06/2015 – 11/2018

- Designed and managed cloud-based Sales and Patient Portals, integrating real-time APIs with Azure SQL databases to support pharmacy operations, patient engagement, and executive decision-making.
- Architected hybrid cloud data solutions across Azure and AWS, enabling scalable, secure, and high-performance analytics for pharmacy and clinical datasets.
- Migrated legacy on-prem systems to cloud environments, implementing HIPAA-compliant encryption, RBAC, and governance controls to safeguard PHI and sensitive healthcare data.

- Built robust ETL/ELT pipelines using SSIS and Azure Data Factory (ADF) to ingest data from EMR/HMR systems, Microsoft Dynamics, and third-party pharmacy platforms into centralized cloud data warehouses.
- Developed and maintained Operational Data Store (ODS) and Enterprise Data Warehouse (EDW) environments, enabling self-service BI and cross-department reporting.
- Implemented data validation, auditing, and reconciliation frameworks to ensure integrity, traceability, and regulatory compliance across ingestion and reporting layers.
- Created SSRS reports and deployed SSAS cubes supporting pharmacy performance metrics, patient adherence tracking, compliance audits, and clinical analytics.
- Leveraged cloud-native capabilities (elastic compute, geo-redundancy, automated backups, disaster recovery) to ensure high availability, SLA adherence, and continuous operational performance.

ESRI Inc

DATA ARCHITECT and INTEGRATION ENGINEER

01/2013 – 06/2015

- Mentored team members on data engineering best practices, leading code reviews to ensure data quality, production consistency, and stability while promoting the use of optimal tools and techniques.
- Led the technical strategy and solution development for data integration projects, driving the alignment of business and technical goals.
- Managed the integration of SAP ERP and Salesforce using SAP Delta queues and Microsoft CDC services to streamline data flows.
- Facilitated the integration of ArcGIS and Workforce data into the existing EDW data model, ensuring seamless data access and analysis.
- Contributed to the Microsoft MDM initiative, overseeing the integration of data from SAP ERP, Active Directory, Salesforce, and SharePoint for consumption by various enterprise applications, including the enrollment portal.
- Spearheaded several initiatives to improve operational efficiency and achieve cost savings within the Data & Analytics function at ESRI, including:
- Achieving an 80% improvement in ETL performance for OLTP applications by leveraging Microsoft CDC services.
- Automating Active Directory management by implementing a new MDM/AD ETL solution, reducing manual processes and errors.
- Standardizing ETL development, deployment, and error-handling practices to ensure consistent and reliable data workflows.

EDUCATION & CERTIFICATIONS

- **UNIVERSITY OF HOUSTON, HOUSTON, TX, BS COMPUTER SCIENCE**
SPECIALIZATION IN DATABASE AND SYSTEM ANALYSIS
- **PMP (PROJECT MANAGEMENT PROFESSIONAL)**
- **PSPO (PROFESSIONAL SCRUM PRODUCT OWNER)**
- **PSM (PROFESSIONAL SCRUM MASTER)**
- **SNOWFLAKE DATA WAREHOUSING WORKSHOP**
