

Eric Dawson

(864) 874-6524 • ericdawson701@gmail.com

Conroe, TX, United States

Summary

Results-driven Data Engineer with 12 years of experience specializing in Microsoft technologies and data solutions. Proven ability to architect and implement enterprise data strategies that enhance business performance. Strong leadership skills with a commitment to mentoring teams and fostering a culture of continuous improvement. Adept at collaborating with cross-functional teams to deliver high-quality data solutions that drive impactful business outcomes.

Skills

Data Engineering: Azure Data Factory, Azure Databricks, Spark, Synapse Analytics, Azure SQL Database

Database Management: SQL, Dimensional Modeling, Relational Databases

Data Integration: API Ingestion, JSON Normalization, Data Orchestration

Project Management: Agile Methodologies, Team Leadership, Client Engagement

Problem Solving: Data Quality, Automation, Scalability, Security Best Practices

Professional Experience

Senior Data Engineer at Mitratesh (2017-09 - Present)

- Architected and implemented enterprise data strategies leveraging Azure technologies, resulting in a 30% improvement in data processing speed.
- Collaborated with cross-functional teams to develop comprehensive data solutions, enhancing reporting capabilities by 25%.
- Led design sessions and workshops with client teams, successfully increasing project engagement and satisfaction rates by 40%.
- Mentored junior data engineers, fostering a culture of continuous learning and improving team performance metrics by 20%.
- Designed and optimized complex dimensional models for reporting using star schemas, leading to more efficient data retrieval.
- Implemented automation processes that reduced data processing errors by 15%, significantly improving data reliability.
- Developed best-in-class data engineering solutions focusing on quality, security, and scalability, contributing to a 50% increase in data accessibility.
- Conducted training sessions on data engineering best practices, enhancing team capabilities and knowledge sharing.
- Created detailed documentation and diagrams to support data architecture, improving project clarity and stakeholder understanding.
- Utilized advanced SQL skills to write complex queries for data transformation, increasing query efficiency by 35%.

Data Engineer at Zenoss (2015-06 - 2017-08)

- Developed and maintained automated data pipelines using Azure Data Factory, which improved data ingestion efficiency by 40%.
- Executed data integration projects involving API sources and OAuth 2.0, standardizing data formats for analytics.
- Collaborated with data scientists and business analysts to create data models that supported key business decisions, enhancing analytics capabilities.
- Led data migration projects that successfully transitioned legacy systems to Azure-based solutions, reducing operational costs by 20%.
- Implemented data quality checks and monitoring systems, which decreased data discrepancies by 30%.
- Designed and enforced data security measures that adhered to best practices, ensuring compliance with industry standards.
- Participated in Agile project management practices, improving team productivity and project delivery timelines.
- Contributed to cross-functional workshops, driving alignment between technical and business teams.
- Analyzed high-volume data streams, developing solutions to enable real-time analytics for business operations.
- Created comprehensive documentation for data processes, enhancing knowledge transfer within the team.

Junior Data Engineer at Idera (2014-07 - 2015-05)

- Assisted in the design and development of data pipelines, achieving a 15% increase in data processing efficiency.
- Supported senior engineers in data modeling tasks, gaining hands-on experience with star schema design.
- Engaged in troubleshooting data issues, successfully resolving 90% of reported discrepancies within 24 hours.
- Participated in code reviews and contributed to the continuous improvement of data engineering practices.
- Learned and applied advanced SQL techniques to enhance data transformation processes.
- Collaborated with team members to document data workflows, improving process clarity and transparency.
- Conducted data validation tests to ensure data integrity and accuracy, leading to a 20% decrease in data errors.
- Attended training and development sessions to enhance technical skills in Azure technologies.
- Supported data migration efforts, assisting in the transition of data to cloud environments.
- Compiled performance reports that informed stakeholders of system efficiencies and areas for improvement.

Education

Bachelor of Science in Computer Science - University of Texas at Austin (July 2017)

Relevant Coursework: Data Structures • Database Management Systems • Data Warehousing

Certifications

- Microsoft Certified: Azure Data Engineer Associate
- Microsoft Certified: Azure Solutions Architect Expert
