Work Experience

Senior MS SQL Database Administrator

SBG Technological Services-Alexandria, VA

December 2022 to February 2025

- O Administered several very large instances of SQL Server for the Veterans Administration
- O Created SQL Server databases, data warehouses, data marts and data lakes
- O Developed numerous SSIS packages (SQL Server Integration Services)
- O Migrated several instances of on-prem SQL Server to Azure
- O Utilized JIRA to track and assign tickets for tasks to be completed.
- O Built database schemas, tables, views, materialized views, procedures, logins, users, and roles.
- O Developed and deployed several SQL Server Agent jobs for regular scheduled backups and maintenance.
- O Provided performance tuning when required to investigate and correct issues.
- O Utilized Azure Data Migration Assistant, Azure Portal and Azure DevOps
- O Built and deployed CI/CD pipelines to capture, cleans (transform) and load data to the target areas
- O Utilized ERWin to model data and create conceptual, logical and physical data models and to produce reverse and forward engineering models
- O Performed data and functional mapping to produce data flow charts and data element dictionaries.
- O Conducted Joint Application Development sessions to ensure proper structuring of CI/CD pipelines and documented all work and published these items using DevOps and Jira.
- O Conducted various reviews of changes and tested and published the results.
- O Created models for OLTP (3rd normal form) and for OLAP to denormalize tables for faster queries.
- O Designed, developed, and maintained scalable data architectures and pipelines to support the business processes and customer requests
- O Built and optimized ETL (Extract, Transform, Load) processes for efficient data ingestion, transformation, and storage on both on premise platforms and cloud solutions

Senior Data Modeler Senior SQL Server DBA/Architect/Data Analyst

Navvis Healthcare-St. Louis, MO

April 2021 to December 2022

- O Utilized Erwin to create entity relationship diagrams for SQL Server databases, data warehouses, and data marts.
- O Developed SSIS packages (SQL Server Integration Services) to load data from several data sources to target areas
- O Created and deployed SQL Server SSRS reports (SQL Server Reporting Services) to track medical claims.
- O Built database schema, tables, procedures and permissions
- O Created MS SQL database structures and made design enhancements to existing databases
- O Established overall design/documentation for MS SQL databases based on application requirements.
- O Produced/maintained design documents for the automated exchange of data between internal/external data sources.
- O Established and maintained effective channels of communication with lines of business and with other groups
- O Performed troubleshooting, correcting discrepancies including long running queries, while maintaining lock management
- O Developed and deployed SQL Server Profiler Traces to analyze current traffic and activity.
- O Utilized SQL Server optimization plans to tune long running transactions
- O Evaluated and recommended new database technologies where applicable
- O Adhered to established department quality standards
- O Managed database security policies and procedures by utilizing a role based model for changes/permissions
- O Developed and deployed APIs and data services to enable secure access to enterprise data collections

Senior Database Administrator
 Aclara Technologies-St. Louis, MO
 September 2019 to October 2020

- O Upgraded several versions of SQL Server 2005 to SQL Server 2017.
- O Migrated 22 instances of SQL Server 2017 into Azure cloud technology.
- O Utilized both IaaS (Infrastructure as a service) and PaaS (Platform as a service) to administer SQL Server Azure.
- O Installed, configured, implemented and maintained SQL Server Always on in Azure
- O Performed installation, maintenance, upgrade, testing, and support of MS SQL and other DBMS systems
- O Installed, configured and administered MySQL instances
- O Implemented data governance, quality assurance, and compliance standards including adhering to Hippa and Sox standards

Senior Database Administrator
 GKN Aerospace-St. Louis, MO

April 2019 to September 2019

- O Installed MS SQL Server 2017 server software and configured database servers
- O Created a 4 node active/passive Windows Failover Cluster solution for 6 instances of SQL Server
- O Monitored and maintained system health and security
- O Configured database tables, views, store procedures, triggers, logins, users, roles and functions
- O Utilized storing and retrieving data tools and created standards for the use of such tools
- O Administered several versions of Oracle from 9i up to 12g.
- O Established, created, scheduled and maintained backup strategies and nightly database maintenance tasks for all Oracle databases.
- O Utilized HP/UX and Linux administration, cron jobs to schedule backups and maintenance of databases.
- O Utilized Oracle RMAN (Recovery Manager) for database backup jobs including full, incremental and archive log backups.
- O Monitored, and resolved data-related issues, proactively identifying opportunities for system improvements.

Senior SQL Server DBA

KPMG-St. Louis, MO

March 2017 to April 2019

- O Administered MS SQL Server databases (2008/2008R2/2012/2014/2016) in a highly complex environment
- O Architected, installed, configured, optimized and managed enterprise-wide SQL Server 2008, 2008 R2, 2012, 2014 and 2016 instances .
- O Configured Always On/HA Capability for SQL Server 2014 instances.
- O Developed and implemented disaster recovery plans for all pertinent application databases and adhered to established service level
- O Displayed a strong knowledge of the SQL Server Management Pack (SSMS/SSIS/SSRS/SSAS).
- O Worked with other senior engineers to establish, implement and enforce a solid release management schedule for production changes.
- O Utilized powershell to call stored procedures and SSIS packages.
- O Mentored junior and intermediate level DBAs and led all aspects of the production environment.
- O Participated in a rotating weekly on call schedule.
- O Utilized dimensional modeling techniques to build a backend data warehouse.
- O Utilized several High Availability solutions including Always On HA Availability Groups, Windows Failover Clustering and Log Shipping
- O Installed, configured and administered MySQL instances/databases

Senior SQL Server DBA/Senior Data Architect

Ellie Mae Mortgage Inc.-St. Louis, MO

June 2016 to March 2017

- O Configured Always On Capability for SQL Server 2014 instances.
 - O Developed SSIS packages to extract data from different sources and load that data into the backend data warehouse.
 - O Upgraded several instances from SQL Server 2005 to SQL Server 2012/2014 .
 - O Developed nightly maintenance scripts to backup databases and rebuild indexes.
 - O Identified and presented gaps in reporting data management capabilities.
 - O Created a data element dictionary for online mortgage applications.
 - O Built and tuned large data loads utilizing SSIS.
 - O Conducted joint application development sessions to map 8 legacy systems into one. Part of a modernization effort to replace an existing system.
 - O Created and maintained conceptual, logical and physical data models
 - O Experience with cloud data platforms (e.g., Azure) and data warehousing solutions.
 - O exercised my knowledge of data modeling, data integration, and API development.
- O Demonstrated my proficiency with data governance, security, and compliance standards

Senior SQL Server DBA

Stifel Nicholas St. Louis-St. Louis, MO

January 2016 to May 2016

- O Administered MS SQL Server databases (2008/2008R2/2012/2014).
- O Configured Always On Capability for SQL Server 2014 instances, creating Availability Groups, Replicas and listeners.
- O Performed normal DBA duties such as creating databases, tables, views, indexes, logins, users, roles, triggers, stored procedures
- O Responded to adhoc customer requests.
- O Performed other duties as required.

Senior Database Administrator, Developer, Project Leader, Data Analyst/ Architect

Webster University-St. Louis, MO

January 2014 to December 2015

- O Created a clustering environment for the university that consisted of 3 active nodes and 1 passive node
- O Configured Database Mirroring and Log Shipping for SQL Server 2012 instances
- O Created both Star and Snowflake dimensional models for data warehouses.
- O Maintained several instances of MS SQL Server and Informix SE

City of St. Charles-Saint Charles, MO

June 2012 to November 2013

- O Administered MS SQL Server databases (2008/2008R2/2012).
- O Created a data warehouse for tracking new businesses, leases and permits.

- O Conducted JAD (Joint Application Development) sessions to identify all entities, attributes and interfaces
- O Conducted data mapping sessions to create models and dictionaries.
- O Developed T-SQL Code and SSIS packages for loading data warehouse/mart

Senior SQL Server DBA
Lear Corporation-Wilmington, NC
July 2011 to May 2012

- O Administered MS SQL Server databases.
- O Performed backup and recovery
- O Implemented an inventory management system using INFOR EAM in order to build a data warehouse and ERP system for Lear
- O Created accounts for all users and assigned security levels
- O Provided end-to-end technical support and problem resolution
- O Scheduled and performed regular server maintenance
- Performed server upgrades and created new servers

Senior SQL Server DBA
SAVVIS-St. Louis, MO
February 2008 to June 2011

- O Administered MS SQL Server databases/performed backup and recovery.
- O Created DTS/SSIS packages and SQL Server Agent jobs .
- O Created and maintained transactional replication, log shipping and database mirroring.
- O Utilized SQL Server profiler/execution plans to identify/tune poorly running queries.
- O Performed data mapping for several legacy applications abd created a new data element dictionary

Senior SQL Server DBA
Apex Systems-St. Louis, MO
November 2007 to January 2008

- O Administered MS SQL Server databases/performed backup and recovery.
- O Created DTS/SSIS packages and SQL Server Agent jobs.
- O Configured Log Shipping and Database Mirroring .
- O Performed other duties as required.

Senior SQL Server DBA/Developer
Advance System Designs-St. Louis, MO
May 2006 to October 2007

- O Administered MS SQL Server databases/performed backup and recovery
- O Created DTS/SSIS packages and SQL Server Agent jobs.
- O Created data warehouse/star schema .

- O Created stored procedures, packages and T SQL scripts.
- O Configured SSAS, SSIS and SSRS Created Erwin data models.
- O Led joint application development sessions to map business processes.
- O Launched an ETL process to convert the legacy data from the different OLTP systems into one environment

SQL Server DBA/Data Modeler/Project Manager/Team Leader
Express Scripts Inc-St. Louis, MO
May 2003 to April 2006

- O Administered MS SQL Server 2000, 2008 and 2008R2/performed backup and recovery.
- O Created DTS/SSIS packages and SQL Server Agent job schedules.
- O Created data warehouse/star schema for customer sales reports and created refresh processes .
- O Created tables, views, indexes, constraints, logins, users, roles, stored procedures, SSIS packages, functions and SQL scripts.
- O Project Manager for SQL Server Consolidation effort to consolidate over 35 instances into an active/passive instance

SQL Server DBA/Data Modeler/Project Manager/Team Leader
Express Scripts Inc-St. Louis, MO
May 2003 to April 2006

- O Administered MS SQL Server 2000, 2008 and 2008R2/performed backup and recovery.
- O Created DTS/SSIS packages and SQL Server Agent job schedules.
- O Created data warehouse/star schema for customer sales reports and created refresh processes .
- O Created tables, views, indexes, constraints, logins, users, roles, stored procedures, SSIS packages, functions and SQL scripts.
- O Project Manager for SQL Server Consolidation effort to consolidate over 35 instances into an active/passive cluster

Senior Systems Engineer
Maryville Technologies-St. Louis, MO
November 1999 to April 2003

- O Administered MS SQL Server 2000
- O Installed/configured Microsoft Windows Clustering/Failover Solutions.
- O Administered Oracle 9i and 10g databases .
- O Developed and deployed data conversion/data warehouse refresh scripts using Unix K shell, Perl and Oracle PL/SQL Scripts .
- O Created Erwin data models for several ITIL/ITSM efforts with Asset/Configuration Management (ITIL) Focus.
- O Created and maintained a Configuration Management Database (CMDB) to keep a current record of all Windows servers,

Application Developer/Data Analyst

United States Department Of Defense-St. Louis, MO

November 1982 to October 1999

- O Developed Cobol/CICS applications utilizing tools such as TSO, ISPF, JCL, MVS tools created by IBM.

- O Designed and implemented a text editor using the "C" language.

- O Developed and implemented several applications using 4th generation languages such as Informix 4GL and Oracle forms.

- O Performed Informix database administrator.

- O Served as the lead data analyst and data manager for many modernization efforts with the department of defense.

- O Conducted joint application development and data mapping sessions.

Education

Diploma

Associate of Science in Information Technology

Lewis & Clark Community College - Godfrey, IL
