FULL STACK ENGINEER (ASP.NET, NODE.JS, REACT)

OBJECTIVE

- Senior Full-Stack Engineer and Data Platform Specialist with 10+ years of experience architecting scalable applications, real-time data pipelines, and AI-powered analytics across enterprise and geospatial domains.
 - Combines deep expertise in modern frontends (React, Angular, TypeScript, TailwindCSS) with robust backends (Node.js/Express, ASP.NET Core, Python/Django) to design and deliver end-to-end, data-driven solutions that are performant, reliable, and intuitive.
 - Proven ability to transform complex datasets into actionable insights using cutting-edge tools like TimescaleDB, Iceberg, LangChain, and vector databases. Combines full-stack development fluency with advanced data modeling, ETL optimization, and DevOps automation to drive business intelligence and operational efficiency.
-

EDUCATION

BS Computer Science | UNIVERSITY OF SOUTHERN MISSISSIPPI

2009 - 2014

Courses Included Data Engineering, Algorithms, Software Engineering, Web Development, and ML.

EXPERIENCE

Project Manager & Technical Consultant | Spiffy Solutions Inc., NC

Sep 2023 – Aug 2025

- Built and maintained full-stack applications using React, Angular, and TailwindCSS on the frontend and Node.js, .NET Core, and Python/Django on the backend, delivering responsive and data-rich user experiences.
- Architected scalable ETL pipelines using Airflow and Kafka, enabling real-time ingestion and transformation of spatial datasets.
- Designed API-first systems with GraphQL and Fastify
- Deployed containerized microservices on AWS and Azure using Docker, Kubernetes, and Terraform

Senior Full Stack Software Developer | Spiffy Solutions Inc., NC

Apr 2018 – Jul 2023

- Designed and developed scalable full stack web applications using Node.js, .NET (ASP.NET Core), React, and Angular.
 - Built and maintained RESTful and GraphQL APIs with Node.js (Express/NestJS) and ASP.NET Core
 - Integrated relational and NoSQL databases including SQL Server, PostgreSQL, and MongoDB, optimizing queries and data access patterns for performance.
 - Established and improved CI/CD pipelines and cloud deployments using AWS, Azure, Docker, and Kubernetes
-

- Engineered ETL workflows with Python (Pandas, SQLAlchemy) and Node.js (Express, Sequelize) for large-scale business and geospatial datasets.
- Developed RESTful and GraphQL APIs to serve complex data models with low latency.
- Built interactive dashboards using React and Highcharts, enabling real-time insights from structured and unstructured data.
- Implemented web scraping pipelines with Python (Scrapy, Selenium) to enrich data lakes with external intelligence.

SKILLS

- | | | |
|------------------------|-------------------------|-----------------|
| • Node.js | • React | • PostgreSQL |
| • ASP.NET | • Angular | • MSSQL |
| • Python | • Next / Nest | • MySQL |
| • Django/Flask/FastAPI | • D3.js | • MongoDB |
| • GraphQL | • HighCharts | • DynamoDB |
| • AWS / Azure / GCP | • Mapbox.js / LeafletJS | • Redis |
| • Pytorch / TensorFlow | • ArcGIS | • Elasticsearch |
| • Beautiful Soap | • QGIS | • PostGIS |
| • Python Scrapy | • GDAL | • LangChain |
| • Selenium | | |

OTHER SKILLS

- Built and maintained web scraping and data extraction solutions using **BeautifulSoup, Scrapy, Selenium, Playwright, and Puppeteer**, efficiently collecting and parsing data from **HTML, XML, and JSON APIs**. Implemented **async scraping, browser automation, and proxy rotation** to ensure reliable, scalable, and high-performance data retrieval.
- Developed geospatial applications using **ArcGIS, QGIS, Mapbox, and PostGIS**, delivering interactive maps and real-time spatial visualizations with **OpenLayers, Leaflet.js, CesiumJS, and Deck.GL**. Performed **spatial analysis, raster and vector processing, geocoding, and 3D mapping** using tools such as **ArcPy, GDAL, GeoServer, and GeoDjango**.
