Professional Summary

Data Engineer with 7+ years' experience designing scalable data engineering solutions on AWS and Azure. Expert in building enterprise AI/ML pipelines, business intelligence integrations, and cloud data platforms supporting advanced analytics and high-value business objectives.

Technical Skills

- **Streaming:** Kafka, Spark Streaming
- **Cloud Platforms:** Azure, AWS, GCP, Azure Data Factory, Azure Databricks, Azure SQL Database, ADLS
- **Visualization:** Tableau, Power BI
- **Integration:** REST APIs, OAuth 2, JSON normalization
- **DevOps:** Docker, Kubernetes, CI/CD, Terraform
- **Data Engineering:** Apache Spark, Airflow, Kafka, dbt
- **Databases:** PostgreSQL, MySQL, MongoDB
- **ETL Tools:** AWS Glue, Informatica, Talend
- **Programming:** Python, SQL, Scala, Java
- **Data Warehousing:** Snowflake, Redshift, BigQuery, Synapse Analytics

Professional Experience

Metlife

Mar 2025 - Present

Senior Data Engineer

USA

- Designed and implemented scalable ETL pipelines using Python, Spark, and Airflow processing 5TB+ of daily data.
- Built cloud data lake architecture on AWS and Azure (utilizing S3, Glue, Redshift, and ADLS) improving analytics performance by 40%.
- Developed real-time streaming pipelines using Kafka and Spark Streaming supporting AI-driven fraud detection models.
- Collaborated with cross-functional data scientists and business intelligence teams, using Python and Spark to integrate supply chain and business operations data for AI and dashboard reporting.
- Optimized SQL queries and partition strategies reducing data processing cost by 30%.
- Architected data integration strategies including ingestion from API sources and standardized JSON-to-SQL mappings that enabled robust data warehousing and supply chain analytics.

TekSolve It Solutions

Oct 2022 - Feb 2025

Data Engineer

charlotte

- Built large-scale batch and streaming data pipelines with Spark, Python, and Airflow on AWS, then deployed them via CI/CD pipelines, which reduced data processing time and supported downstream analytics
- Implemented Snowflake data warehouse supporting enterprise analytics and AI workloads.
- Integrated data from REST APIs, MySQL databases, S3 storage, and Azure Data Factory using Python and AWS Glue, consolidating information into Snowflake to create a single source of truth that improved data accessibility for business intelligence and supply chain analytics teams.
- Automated data quality validation and monitoring dashboards improving pipeline reliability.
- Supported machine learning workflows by developing scalable feature pipelines.
- Collaborated with business analysts and Azure cloud admins to deliver integrated migration and data solution strategies supporting operational reporting.

TekSolve It Solutions

Jul 2019 - May 2021

Data Engineer

Charlotte

- Developed ETL workflows using Python, SQL, and Apache Spark on GCP to process enterprise datasets, enabling downstream analytics teams to access refreshed data daily
- Maintained Snowflake relational databases and rewrote SQL queries, cutting report generation time by 20%
- Built automated data ingestion pipelines for business intelligence and reporting systems, including supply chain analytics dashboards.
- Collaborated with analytics and BI teams to deliver clean, structured data suitable for AI and real-time dashboards.
- Improved data pipeline performance and reduced processing times through optimization.
- Standardized and normalized JSON from API sources for ingestion to relational databases, supporting scalable data integration.

Education

clark university

Jan 2022 - Dec 2022

Bachelor's Degree, Computer Science / Information Systems

worcester

- **GPA:** 3.8
- **Achievements:** Student council president

Bachelors in computer science/ generals

Jun 2016 - Jun 2019

generals

hyderabad

- **GPA:** 8.7

Certifications (Optional)

- AWS Certified Data Analytics – Specialty
- Google Professional Data Engineer
- Microsoft Azure Data Engineer Associate
