

Larry Parker

Data Engineering Manager

✉ parkerlarry8282@gmail.com 📞 (239) 421 5648 📍 Tooele, UT

PROFESSIONAL SUMMARY

Experienced **Data Engineering Manager** with over 10 years of expertise in designing and managing scalable cloud-based data platforms and **ETL/ELT pipelines** across **AWS, Azure, and GCP environments**. Skilled in leading complex data migrations, building real-time data integration solutions, and optimizing performance for large datasets. Proven track record in automating workflows with modern orchestration tools like **Apache Airflow** and **AWS Lambda**, and delivering actionable business insights via interactive dashboards in **Power BI** and **Tableau**. Strong background in **data modeling, predictive analytics, and machine learning**, with a deep understanding of dimensional data models, data lakes, and cloud technologies. Adept at driving efficiency through automation, performance tuning, and advanced query optimization techniques, enabling organizations to leverage their data for strategic decision-making.

CORE COMPETENCIES

Cloud & Data Platform Technologies	AWS (S3, Redshift, Lambda, Glue), Azure (Synapse, Data Factory, Logic Apps), GCP (BigQuery, Cloud Storage, Cloud Composer, Dataproc), Snowflake, Delta Lake, Terraform, Databricks
ETL & Data Integration	Apache Airflow, AWS Glue, Azure Data Factory, PySpark, Apache Spark, AWS Lambda, GCP Cloud Functions, Data Lakes, Batch & Real-Time ETL/ELT, CI/CD Pipelines (Docker, Jenkins, GitHub)
Data Warehouse Architecture & Modeling	Star Schema, Snowflake Schema, Slowly Changing Dimensions (SCD Type 2), Data Vault, Dimensional Data Models, Data Lake Architecture
SQL & Databases	SQL Server, PostgreSQL, MySQL, Google Cloud SQL, BigQuery, Redshift, Snowflake, Oracle, AWS RDS, Cloud Storage
Data Processing & Analytics	Batch & Real-Time Data Processing, Data Partitioning & Clustering, Materialized Views, Spark SQL, Delta Lake, GCP Cloud Dataflow, Apache Spark
Business Intelligence & Reporting	Power BI, Tableau, Matplotlib, Seaborn, Interactive Dashboards, Reporting Solutions, Data Visualization
Machine Learning & Predictive Analytics	TensorFlow, Scikit-Learn, Predictive Models, Decision Trees, Logistic Regression
Automation & Orchestration	Apache Airflow, GCP Cloud Composer, AWS Lambda, Azure Logic Apps, Terraform, CI/CD Pipelines, Automation with AWS & GCP Tools
Data Management & Optimization	Cloud Data Lakes, Data Redundancy Reduction, Data Migration (Oracle, SQL Server to Snowflake), Query Optimization, Data Transformation, Performance Tuning

PROFESSIONAL EXPERIENCE

Data Engineering Manager - Salt Lake City, UT

Vaco

NOV 2021 – PRESENT

- Architected and managed scalable data pipelines using **AWS** (S3, Redshift, Lambda, Glue) and **Azure** services (Azure Synapse, Data Factory), enabling seamless **ETL processes** and integration across diverse cloud platforms.
- Designed and implemented complex ETL workflows using **AWS Glue, Azure Data Factory, and Apache Airflow** to automate data ingestion, transformation, and loading into cloud-based data warehouses (Redshift, Snowflake).
- Designed and deployed cloud-native **ELT architecture** using **AWS Lambda** and **Azure Functions**, ensuring seamless and highly available data processing pipelines across multi-cloud environments.
- Optimized **SQL queries** and data transformations, reducing processing time for large datasets by fine-tuning query execution plans and leveraging **data partitioning and indexing** techniques.
- Built and maintained **cloud data lakes** on **AWS S3** and **Azure Data Lake**, ensuring smooth data ingestion from various sources, including **SQL Server, Oracle, and CSV files**.
- Led the migration of on-premise databases (Oracle, SQL Server) to **Azure Data Lake** and **Snowflake**, significantly reducing data redundancy and improving scalability and performance.

- Developed real-time data integration solutions with **AWS Lambda** and **Azure Logic Apps** to automate revenue tracking and real-time analytics.
- Designed and optimized **batch** and **streaming ETL** workflows using **Apache Spark** (PySpark, Spark SQL) and **AWS Glue**, processing large-scale datasets for analytical and reporting purposes.
- Developed interactive dashboards and reporting solutions using **Power BI** and **Tableau**, empowering business stakeholders with real-time insights and actionable metrics.
- Collaborated with cross-functional teams to define KPIs and implemented complex **data models** (Star, Snowflake schemas, SCD Type 2) for accurate performance tracking.
- Automated cloud data management workflows with **AWS Lambda**, **Azure Data Factory**, and **Terraform**, reducing manual intervention and increasing operational efficiency.

Senior Data Engineer - Orlando, FL

Simform

AUG 2017 – AUG 2021

- Architected and managed **cloud-based data pipelines** using **AWS** (EC2, S3, Redshift) and **Google Cloud Platform** (BigQuery, Cloud Composer), enabling seamless data movement across cloud environments.
- Developed **Apache Airflow DAGs** for scheduling and managing ETL workflows, improving pipeline reliability and scalability in cloud environments.
- Led the migration of on-premise data solutions to **Google Cloud Platform (GCP)**, utilizing **BigQuery**, **Cloud Storage**, and **Cloud Functions** for optimized data processing and analytics.
- Implemented self-service **ELT pipelines** using **Airflow** and **GCP Cloud Composer**, enabling business users to build and modify their data ingestion processes without requiring developer intervention.
- Integrated **batch** and **real-time processing** using **Apache Spark** (PySpark, Spark SQL) and **GCP Dataproc** to process large datasets and generate business-critical insights.
- Applied **data lake architecture** with **Delta Lake** and **GCP Cloud Storage** to manage and optimize large-scale data storage and processing.
- Developed and deployed **machine learning models** using **TensorFlow** and **Scikit-Learn**, applying techniques like decision trees and logistic regression to enhance predictive analytics capabilities.
- Designed and implemented **data orchestration** solutions using **Apache Airflow**, **GCP Composer**, and **Jenkins** to streamline data processing and delivery pipelines.
- Automated **CI/CD pipelines** with **Docker**, **GitHub**, and **AWS** for seamless deployment and testing of cloud data pipelines, reducing the time to production.
- Optimized **data warehouses** using **BigQuery** and **Redshift** for efficient querying and reporting, applying best practices in **data partitioning**, **clustering**, and **indexing**.

Data Engineer - Canonsburg, PA

Rivers Agile

OCT 2012 – AUG 2017

- Designed and implemented scalable **ETL pipelines** using **Google Cloud Platform** services like **BigQuery**, **Cloud Dataflow**, and **Cloud Functions**, enabling efficient data processing and transformation at scale.
- Developed and automated data workflows using **Apache Airflow** and **GCP Cloud Composer**, ensuring reliable data movement and timely processing across systems.
- Led the design and optimization of **dimensional data models** (Star, Snowflake) for both transactional and analytical data storage, improving data accessibility for reporting and analysis.
- Applied **Slowly Changing Dimensions (SCD Type 2)** techniques in data warehouses to support historical data retention and longitudinal analysis.
- Engineered **data lake solutions** using **Google Cloud Storage (GCS)** and **BigQuery**, integrating both structured and unstructured data from various sources for efficient analytics.
- Built **real-time streaming** solutions using **Google Pub/Sub** and **Cloud Dataflow**, enabling near real-time data processing and event-driven architectures.
- Optimized **SQL queries** and data transformations in **BigQuery**, leveraging **materialized views** and **indexing** to improve performance for large-scale datasets.
- Applied **machine learning models** using **Python** (Scikit-Learn) to enhance data-driven decision-making for marketing and customer targeting efforts.
- Implemented **CI/CD pipelines** using **Docker** and **GitHub** for continuous integration and deployment of data pipelines on **GCP**.
- Led the development of interactive **data visualizations** using **Matplotlib** and **Seaborn**, facilitating better insights into customer behavior and business trends.

EDUCATION

Bachelor's degree in computer science

University of Utah

MAY 2012
