SUMMARY

Results-driven Data Analyst with 4+ years of experience delivering impactful analytics across retail and BFSI domains. Skilled in Python, SQL, Power BI, and Snowflake, I have built predictive models, automated ETL pipelines, and designed real-time dashboards that improved forecast accuracy, reduced stockouts, and strengthened compliance reporting. With expertise in cloud platforms (AWS, Azure, BigQuery), data governance, and A/B testing, I excel at transforming complex data into actionable insights that drive efficiency, revenue growth, and strategic decision-making.

TECHNICAL SKILLS

Programming & Data Processing: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Advanced SQL, Shell Scripting, Bash

Data Visualization Tools: Power BI, Tableau, Looker, Excel Pivot Tables, VLOOKUP, Dashboards, Macros, Seaborn, DAX

Databases & Query Engines: Snowflake, Google BigQuery, Microsoft Access

Cloud, Data Engineering & Automation: AWS S3, EC2, Athena, Azure Data Studio, Azure Synapse, dbt, Airflow, API Integration, ETL Pipelines with Python, Data Cleaning and Transformation, Batch Processing, Apache Spark, DataFrame Optimization

Analytics & Business Intelligence: KPI Tracking, Trend Analysis, Forecasting, A/B Testing, Data Validation, Data Modeling Star Schema, Data Modeling Snowflake Schema, Data Governance, Data Quality Monitoring, Root Cause Analysis, Cross-Team Reporting, Google Analytics

Collaboration & Version Control: Git, JIRA, Confluence, Agile Scrum, Slack, MS Teams, Google Docs, Notion

Compliance & Privacy: GDPR, HIPAA

PROFESSIONAL EXPERIENCE

Data Analyst, Walmart

Jan 2024 – Present | Remote, USA

- Automated sales reporting pipelines with Python and Airflow, cutting processing time by 70% and enabling real-time visibility into pricing, promotions, and inventory adjustments.
- Built scalable Snowflake data warehouses supporting 600+ merchandising stakeholders, improving reporting efficiency by 45% and accelerating analytics performance across 150M+ daily transaction records.
- Developed real-time demand sensing pipelines with Kafka and Azure Stream Analytics, reducing stockout incidents by 28% and enhancing inventory allocation accuracy across 5,000+ Walmart stores.
- Designed predictive replenishment models in Python and Azure ML, improving forecast accuracy by 19% and reducing excess inventory holding costs by \$2.1M annually.
- Created 20+ Power BI dashboards for executive leadership, visualizing sales, supply chain KPIs, and store performance, shortening quarterly business reviews by 35% and improving insights.
- Implemented anomaly detection frameworks ensuring 99% data accuracy across pricing, loyalty, and promotions pipelines, proactively identifying inconsistencies and minimizing financial reporting errors.
- Conducted A/B testing on online promotions, identifying optimal discount strategies that improved conversion rates by 14% and generated \$3.4M incremental digital channel revenue.
- Trained 75+ Walmart employees across merchandising, e-commerce, and logistics teams on self-service analytics, boosting dashboard adoption 60% and decreasing ad-hoc IT report requests significantly.

Data Analyst, TCS

May 2020 – Dec 2022 | Remote, India

- Designed automated ETL pipelines in Python and Airflow to process 4TB+ daily financial data, reducing latency by 45% and improving reporting efficiency for compliance teams.
- Developed SQL-based risk reporting solutions enabling portfolio managers to analyze 200K+ transactions weekly, reducing operational bottlenecks and supporting faster investment decision-making.
- Built 12 interactive Power BI dashboards tracking KPIs for credit risk, liquidity, and loan portfolios, enhancing transparency and cutting executive reporting turnaround by 60%.
- Implemented data validation frameworks detecting anomalies during ingestion, minimizing downstream errors by 30% and improving confidence in analytics for auditors and stakeholders.
- Conducted root cause analysis of failed ETL jobs, resolving 80+ recurring data pipeline issues, ensuring accuracy for quarterly financial and regulatory compliance reporting.
- Collaborated with cross-functional teams to document 25+ workflows, improving knowledge sharing, project onboarding efficiency, and ensuring adherence to GDPR and internal audit requirements.
- Automated reconciliation processes using SQL scripts and macros, reducing manual effort by 18 hours weekly and improving data integrity across multiple banking systems.
- Delivered customer churn prediction models leveraging Python and Scikit-learn, improving retention strategy effectiveness by 14% and enabling targeted client engagement campaigns.

EDUCATION

Master of Science, University of North Texas

Jan 2023 – May 2024 | TX, USA

Business Analytics

Bachelor of Technology, B V Raju Institute of Technology

Aug 2016 – May 2020 | Telangana, India
