

Elijah Foster

Abilene, TX | +1 435 200 9454 | elijah.foster.sen@gmail.com

SUMMARY

Data Engineer with over 10 years of experience in designing and implementing data strategies within the Microsoft ecosystem. Proven track record in developing enterprise data solutions that enhance data quality, reliability, and scalability. Adept at collaborating with cross-functional teams to deliver comprehensive data solutions, optimizing data pipelines, and leading data engineering projects. Strong problem-solver with a passion for modern data architectures and a commitment to continuous learning and growth.

SKILLS

Data Engineering: Azure Data Factory, ADLS, Azure Databricks, Spark, Synapse Analytics, Azure SQL Database, Data Orchestration, Data Integration, Dimensional Modeling

Databases: Advanced SQL, Relational Databases, JSON Normalization, Metadata-Driven Techniques

Cloud & DevOps: Azure Cloud, CI/CD Pipelines, Automation, GitHub Actions

Project Management: Agile, Scrum, Leadership, Technical Guidance, Documentation

Collaboration: Cross-Functional Team Collaboration, Client Engagement, Workshops, Training

EXPERIENCE

Senior Data Engineer

Mochi Health | November 2022 – December 2025 | San Francisco, CA (Remote)

- Led the architecture and implementation of data engineering solutions using Azure technologies to support healthcare analytics.
- Developed and optimized complex dimensional models for reporting, enhancing data accessibility and usability.
- Collaborated with business intelligence developers and analysts to create automated data pipelines, ensuring data quality and reliability.
- Conducted workshops and training sessions for internal teams and clients on data integration best practices.
- Mentored junior data engineers, providing technical guidance and fostering a culture of continuous improvement.
- Championed diagramming and documentation practices, improving project clarity and stakeholder communication.

Senior Data Engineer

EnergyFunders | May 2020 – October 2022 | San Antonio, TX (Hybrid)

- Architected and built data orchestration pipelines using Azure Data Factory, improving data migration efficiency by 30%.
- Integrated APIs and handled real-time data ingestion, standardizing JSON data structures for SQL compatibility.
- Collaborated with cross-functional teams to develop data strategies that enhanced business outcomes and client satisfaction.
- Led design sessions with client teams to identify data needs and develop comprehensive solutions aligned with their objectives.
- Implemented security best practices in data architecture, ensuring compliance with industry standards.

Data Engineer

EagleView | January 2016 – March 2020 | Rochester, NY (Onsite)

- Developed and deployed data solutions for geospatial applications, utilizing Azure SQL Database and data lakes.
- Migrated legacy systems to modern data architectures, significantly improving data processing capabilities and performance.
- Partnered with UX teams to ensure data solutions met user needs and improved overall application usability.
- Conducted code reviews and introduced automated testing practices, enhancing data quality assurance processes.
- Collaborated with DevOps teams to monitor performance and deploy data solutions using CI/CD practices.

Data Engineer Intern

EagleView | July 2014 – December 2015 | Rochester, NY (Onsite)

- Assisted in the development of data pipelines and integration processes for internal analytics dashboards.
 - Supported debugging and testing efforts to ensure reliable data delivery and reporting accuracy.
 - Documented technical changes and contributed to project notes, improving team collaboration and knowledge sharing.
-

EDUCATION

Pace University

Bachelor's degree, Computer Science, Apr 2010 - May 2014

Certifications

Microsoft Certified: Azure Data Engineer Associate

AWS Certified Cloud Practitioner

Data Engineering on Google Cloud Specialization • Coursera

Data Warehousing for Business Intelligence • Coursera
