

Pavani Reddy

Irving, TX, USA | +1 469-426-2635 | Pavani.data.reddy@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Data Engineer with 7+ years of experience building cloud-based data platforms across healthcare and financial domains. Proven expertise in Spark-based data processing, cloud data warehousing, and workflow orchestration with Databricks, Snowflake, Airflow, and AWS to handle high-volume, regulated datasets. Strong background in data modeling, performance optimization, and data governance, with a track record of improving data reliability and analytics delivery by 30–40%. Experienced in supporting analytics, data science, and business teams with secure, production-ready datasets for reporting, forecasting, and machine learning use cases.

PROFESSIONAL EXPERIENCE

Cigna Health (Expandtree Inc)

Jan 2024 - Present

Sr. Data Engineer

Remote

- Designed end-to-end ETL/ELT pipelines using Airflow, Databricks, and Snowflake to process high-volume healthcare data, reducing pipeline failures and latency by 40%.
- Built cloudbased data lake and warehouse solutions on AWS (S3, Redshift) and Snowflake to support claims, clinical, and eligibility datasets, enabling analysts to access and query data more quickly for reporting
- Created PySpark logic to standardize healthcare data, making it easier for teams to analyze and report.
- Integrated data validation, audit checks, lineage tracking, and monitoring frameworks, lowering data-quality incidents by 35%.
- Partnered with analytics stakeholders to define KPIs and deliver curated datasets, cutting manual data interpretation effort by 40%.
- Applied encryption, IAM, and access-control policies to meet HIPAA compliance requirements.

Fidelity Investments (Expandtree Inc)

Jan 2022 - Jan 2024

Sr. Data Engineer

Dallas, TX

- Built high-throughput ingestion pipelines using AWS Glue, Kafka, Lambda, and Python to process millions of financial transactions daily.
- Engineered ELT workflows on Snowflake, Redshift, and dbt to support analytical reporting and downstream data consumption.
- Automated recurring data operations using Python, Pandas, and SQLAlchemy, reducing manual data preparation effort by 60%.
- Optimized dimensional data models and SQL/PLSQL logic for trading, risk, and compliance datasets, cutting query latency by 40%.
- Produced analytics-ready datasets supporting risk analysis and fraud detection use cases, improving feature availability for modeling teams.
- Enabled data scientists by delivering clean, well-modeled feature datasets, shortening model development cycles by 35%.
- Strengthened deployment reliability by integrating CI/CD pipelines with Jenkins and Git, reducing release cycles by 70%.

Wipro Technologies

Mar 2017 - Feb 2020

Senior Associate

Hyderabad, India

- Developed SQL-based transformation logic and ETL scripts to support enterprise reporting and operational data workflows.
- Orchestrated scheduling and optimization of large-scale ETL jobs, reducing data refresh durations by 30% and improving pipeline reliability.
- Delivered BI dashboards using Tableau and Power BI to automate recurring reports and reduce manual reporting effort by 50%.
- Evaluated data quality through audits and validation checks, increasing overall data accuracy by 30%.
- Supported cross-functional teams by translating business requirements into data pipelines and reporting solutions, enabling faster decision-making for stakeholders

SKILLS

- **Programming & Scripting:** Python, SQL, PL/SQL, T-SQL, Shell Scripting, Java
- **Databases & Data Warehousing:** Oracle, SQL Server, PostgreSQL, MySQL, MongoDB, Hive, Snowflake, Redshift, Azure Synapse, Azure Data Lake, MDM Systems
- **Big Data & ETL Tools:** Spark, PySpark, Hadoop, Kafka, Airflow, Databricks, dbt, AWS Glue, Informatica, SSIS, Talend
- **Cloud Platforms:** AWS, Azure, GCP
- **DevOps & CI/CD:** Git, GitLab, Jenkins, Docker, Kubernetes, CI/CD pipelines
- **Analytics, BI & Financial Tools:** Power BI, Tableau, Looker Studio, Power Query, Essbase/SmartView, SAP, Advanced Excel (VLOOKUP, PivotTables, Macros), PowerPoint
- **AI/ML & Automation:** Scikit-learn, MLflow, TensorFlow Lite, Flask, Django
- **Domain & Core Expertise:** FP&A Reporting, Budgeting & Forecasting, Month/Quarter Close Support, Ad-Hoc Analysis, KPI Tracking, Data Governance, Stakeholder Engagement

EDUCATION

SSJ Institute of Technology

Bachelor of Computer Science

Aug 2013 - May 2017

KEY ACHIEVEMENTS

- Presented real-time FP&A dashboards that improved reporting turnaround time by 30%.
- Supported budgeting and forecasting processes for \$200M+ business operations, consolidating financials across multiple segments.
- Reduced reporting-cycle errors by 40% through optimized financial data models and standardized procedures.
- Advised VP-level leadership by producing actionable financial dashboards and models, shaping major investment and procurement strategies and reducing decision timelines by 35%.
