

Alee Shaheed

Data Engineering Professional | Cloud & Big Data Platforms

✉ aleeshaheed2@gmail.com ☎ (571) 583-4161 📍 20148, Ashburn, Virginia

PROFILE

Senior Data Engineer with 12+ years of experience designing and operating scalable, cloud-native data platforms across AWS and Azure. Proven expertise in building reliable batch and streaming pipelines (Airflow, Kafka, Spark), optimizing modern data warehouses (Snowflake, Redshift), and enforcing data governance, security, and compliance (GDPR, HIPAA, PCI-DSS). Strong track record of leading cross-functional teams, reducing infrastructure costs through performance tuning and automation, and enabling analytics and ML workloads that drive measurable business outcomes.

SKILLS

Data Engineering & Pipelines: Apache Airflow, Kafka, Spark (Structured Streaming), dbt, Apache Beam, AWS Glue, Azure Data Factory

Cloud & Platforms: AWS (S3, Redshift, EMR, Lambda, Glue, SageMaker), Azure (Data Lake, Databricks, Synapse), GCP (BigQuery, Cloud Storage, Dataflow)

Data Warehousing & Modeling: Snowflake, Redshift, BigQuery, Dimensional Modeling (Kimball), Data Marts, SCD Type 1/2

Databases: PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Elasticsearch

Programming & Querying: Python, SQL (advanced), Scala (basic), Bash/Shell

Data Quality & Observability: Great Expectations, custom DQ checks, schema validation, freshness/volume monitoring, data lineage

BI & Analytics: Tableau, Power BI, Looker; semantic layer design; self-service analytics enablement

Streaming & Messaging: Apache Kafka, event-driven architectures, near-real-time ingestion

PROFESSIONAL EXPERIENCE

Senior Data Engineer (Data Integration Platform), CData Software

01/2021 – Present

- Designed and maintained high-throughput ETL/ELT pipelines integrating multiple SaaS and database sources into Snowflake and Redshift.
- Built streaming ingestion using Kafka for near-real-time analytics, improving data latency and pipeline reliability.
- Implemented data connectors and schema evolution to support evolving APIs and source systems with zero- downtime upgrades.
- Orchestrated workflows with Apache Airflow, adding retries, SLAs, and alerting to improve pipeline reliability and observability.
- Optimized cloud storage and compute on AWS (S3, EMR, Lambda) through partitioning strategies and autoscaling policies.
- Enforced data governance and security controls (RBAC, encryption in transit/at rest, audit logging) for regulated customers.

Cloud Data Engineer (Product Analytics & Integrations), *Responsive*

07/2016 – 12/2020

- Built a cloud-native data platform on AWS to ingest product telemetry and customer usage events at scale.
- Implemented real-time event processing with Kafka and Spark Streaming to support product analytics and operational alerting.
- Developed API-based ingestion services and batch loaders for third-party integrations including CRM and support systems.
- Created operational dashboards for engineering and customer success to enable near-real-time KPIs and monitoring.
- Automated data lifecycle management including retention and archival aligned with compliance requirements.
- Collaborated with DevOps to productionize pipelines using Docker, Kubernetes, and CI/CD practices.

Analytics Data Engineer (BI & Semantic Layer), *GoodData*

06/2013 – 06/2016

- Designed and maintained enterprise semantic layers (facts, dimensions, metrics) to enable governed self-service analytics across BI tools.
- Built batch data pipelines using dbt and Airflow to transform raw events into analytics-ready data marts with quality checks.
- Implemented incremental loading and SCD Type 2 for core business entities to ensure historical accuracy and traceability.
- Tuned Snowflake/BigQuery performance using clustering, pruning, and caching to improve dashboard query responsiveness.
- Developed data quality monitoring for freshness, volume, and schema drift with automated alerting.
- Partnered with analytics and product teams to define SLAs, lineage, and documentation for governed analytics delivery.

EDUCATION

Bachelor of Science | Computer Science, *PUCIT (Lahore)*
