SUMMARY

Senior Business Intelligence Developer with extensive experience in creating value-adding data solutions. Renowned for an empathetic and inquisitive approach to understanding business users' data and reporting pain points. Proven track record of collaborating with cross-functional teams, including HR, Finance, and Sales Operations to meet business needs.

SKILLS

Languages: SQL, DAX, M Language, Python, HTML/CSS, XML

Engineering Tools: Snowflake, Fivetran, AWS Lambda/S3, Postman API, GitHub

Visualization Tools: Tableau, PowerBI

Communication: Stakeholder Management, Requirements Gathering, Business Logic Translation

Certifications: Tableau Desktop Specialist (Sept. 2023), Snowflake SnowPro Core (Dec. 2025)

EXPERIENCE

Senior Business Intelligence Developer

Arctic Wolf | May 2024 - Present

- Engineered data pipelines leveraging AWS Lambda, Snowflake and Fivetran, ingesting data from 6 new sources into warehouse for enhanced analysis.
- Redesigned complex sales data transformation processes by rebuilding core ETL logic using Snowflake SQL, ensuring consistent output through detailed pipeline validation.
- Reduced Tableau data extract refresh time by up to 75% via optimized custom Snowflake SQL queries and procedures.
- Standardized stakeholder intake by configuring Slack workflows to directly translate user inputs into automated backend processes, significantly reducing friction in the user-to-ticket lifecycle.
- Improved technology maturity with implementation of GitHub integration to Snowflake, allowing BI team to maintain versioning and approvals on warehouse transformation code.

Business Intelligence Developer

Arctic Wolf | June 2022 - May 2024

- Eliminated business user need for manual report extraction and manipulation with the creation of 5 new Tableau dashboards - ranging from financial monthly close reporting to facilities attendance metrics.
- Engaged directly with 4 critical business partners to understand and document reporting requirements, leading to more accurate and actionable insights.
- Selected to present at all-company FY Kick-Off Panel (2,000+ attendees), sharing experience of successfully building cross-functional relationships.

Senior IT Application Analyst

Calyxt | January 2021 - June 2022

- Built 4 PowerBI dashboards, automating the aggregation and joining of multiple data sources for end users.
- Transformed source data using DAX and M Language in Power Query Editor for analysis.
- Consulted with 3 business partners to understand top 5 KPIs, migrating calculations from Excel to PowerBI.
- Overhauled Lab Supply Purchasing Process leveraging Power Automate, eliminating need for workflow cloud tool contract, resulting in savings of over \$20,000 annually.

IT Business Analyst

Cargill | April 2020 - January 2021

- Established Business Intelligence module requirements for 2 ERP deployments in Global IT.
- Translated requirements from legacy reporting to future state in custom business intelligence tool.
- Facilitated cross-functional collaboration between business users and technical teams to clarify data integration needs.

IT Systems Analyst Associate

Cargill | October 2018 - April 2020

- Built & executed Global IT Project & Portfolio Management data strategy for the Enterprise Project Management Office.
- Reduced team's data collection & analysis effort time by 15 hours per week.
